Table S2 List of physiological index measurement methods used in this study.

Physiological Indicators	Calculation Formulas	Explanations
Chlorophyll content	$\text{Chl}(\text{g} \cdot \text{kg}^{-1}) = (12.7A_{663} - 2.69A_{645}) V/W + (22.9A_{645} - 4.68A_{663}) V/W$	A: absorbance value; V: total volume of reaction solution (mL); W: fresh weight of sample (kg).
Proline content	$\text{Pro}(\mu\text{g/g}) = C \cdot V/W \cdot v_1$	C: proline content calculated from the standard curve (μg); V: total volume of extract solution (mL); W: fresh weight of sample (g); v_1 : volume of extract solution used in the measurement (mL).
Relative conductivity	$\text{Rel} = R_1 / R_2 \cdot 100\%$	R_1 : leachate conductivity; R_2 : leachate conductivity after cooling.
POD activity	$\text{POD}(\text{U/gropt}) = \Delta A \cdot V / 0.01 \cdot v_2 \cdot \Delta t \cdot W$	ΔA : difference value in absorbance; V: total volume of reaction solution (mL); v_2 : volume of enzyme solution added (mL); Δt : reaction response time; W: fresh weight of sample (g). Take the A_{470} drop by 0.01 in 1 min as 1 POD activity unit (U).
CAT activity	$\text{CAT}(\text{U/gropt}) = \Delta A \cdot V / 0.01 \cdot v_3 \cdot \Delta t \cdot W$	ΔA : difference value in absorbance; V: total volume of reaction solution (mL); v_3 : volume of enzyme solution added (mL); Δt : reaction response time; W: fresh weight of sample (g). Take the A_{600} drop by 0.01 in 1 min as 1 enzyme activity unit (U).
MDA activity	$\text{MDA}(\text{nmol/g}) = (\Delta A_{532} - \Delta A_{600}) \cdot V \cdot v_4 / 1.55 \cdot 10^{-1} \cdot W \cdot v_5$	ΔA_{532} : difference value between absorbance at 532 and 450; ΔA_{600} : difference value between absorbance at 600 and 450; V: total volume of reaction solution (mL); v_4 : total volume of extract solution (mL); W: fresh weight of sample (g); v_5 : volume of the extract solution added in the color reaction (mL).

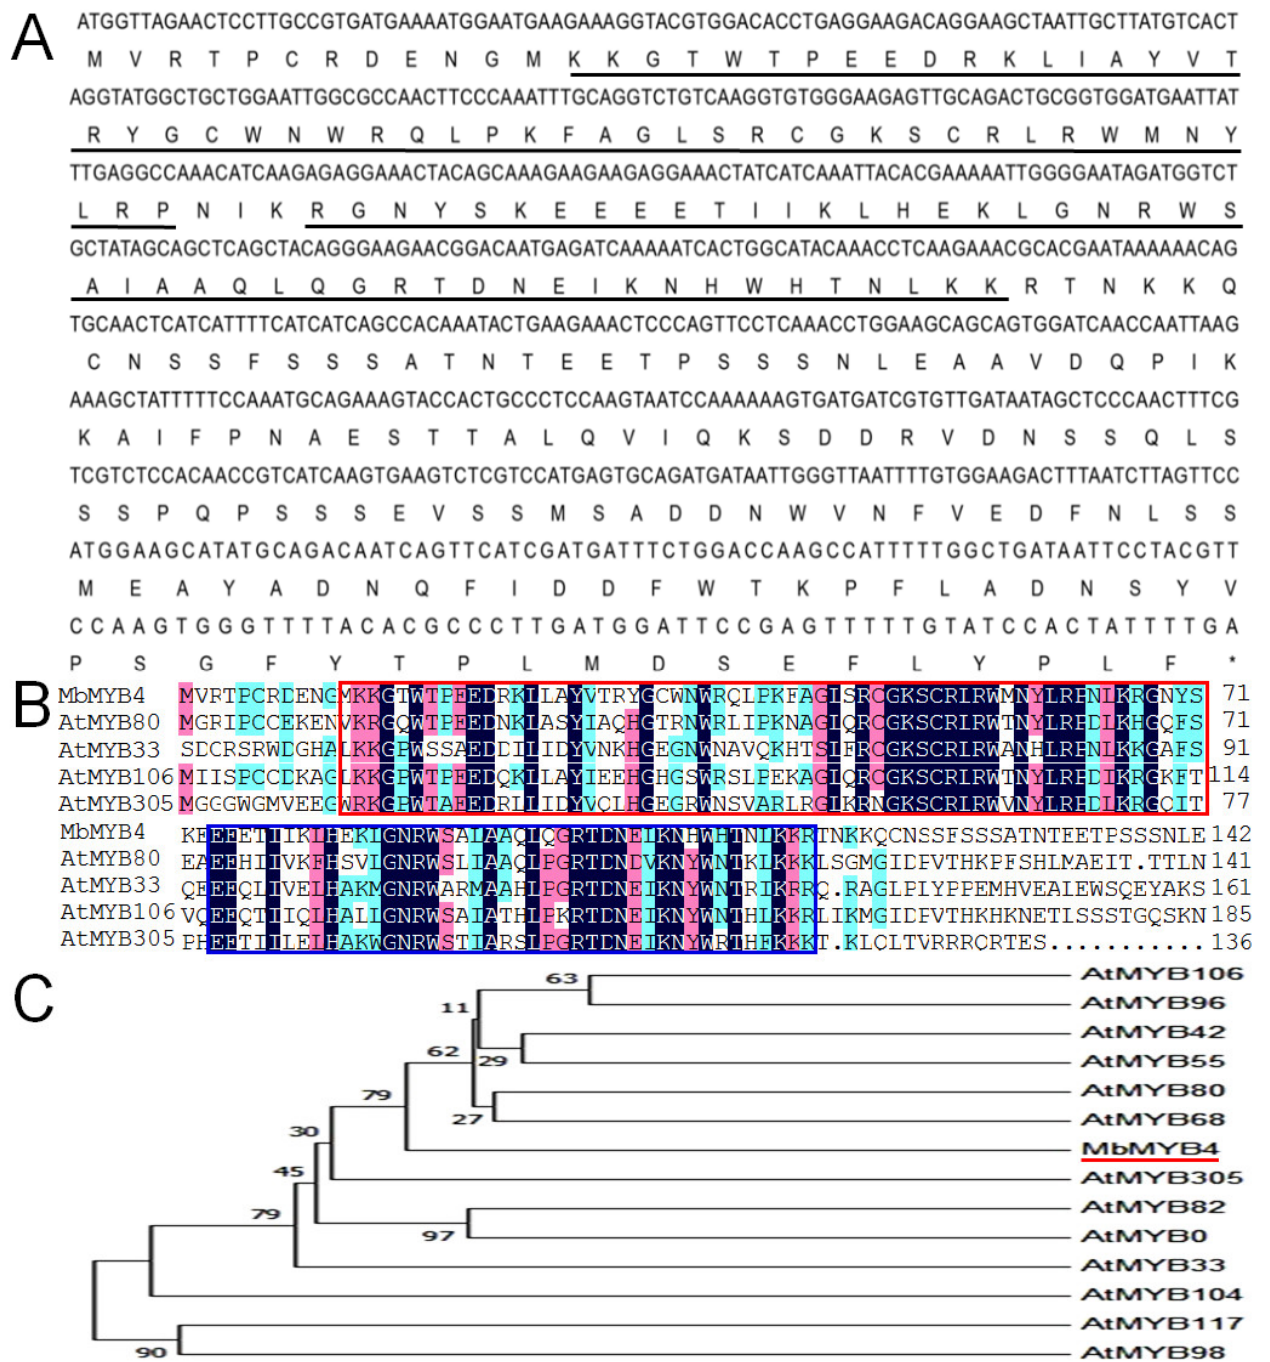

Figure S1. (A) Nucleotide and deduced amino acid sequences of *MbMYB4* gene. The conserved domain of R2 and R3 is underlined. (B) Comparison of homology between *MbMYB4* and several *Arabidopsis thaliana* MYB proteins in order to point to the conservative domains.
