

## Supplementary Material

**Figure S1. A.** Raw image of Figure 1A (left) from the main text.

Figure S1. B. Raw image of Figure 1A (right) from the main text.

Figure S2. CD90, and CD105, but not CD146, in EVs isolated from cultures of adipose MSC. The dotted traces at the left of the panels correspond to EVs only incubated with secondary IgG as a negative control.
