

**Supplementary Materials:**

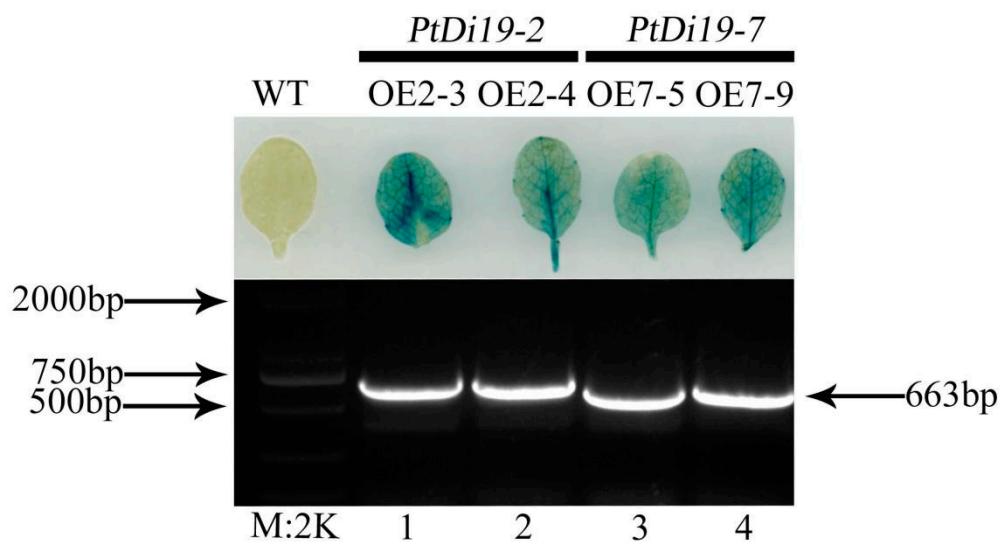

**Figure S1.** Chromosomal localizations and duplications of Di19 genes on *P. trichocarpa* chromosomes, of which the segmental duplicated Di19 genes indicated with blue lines.

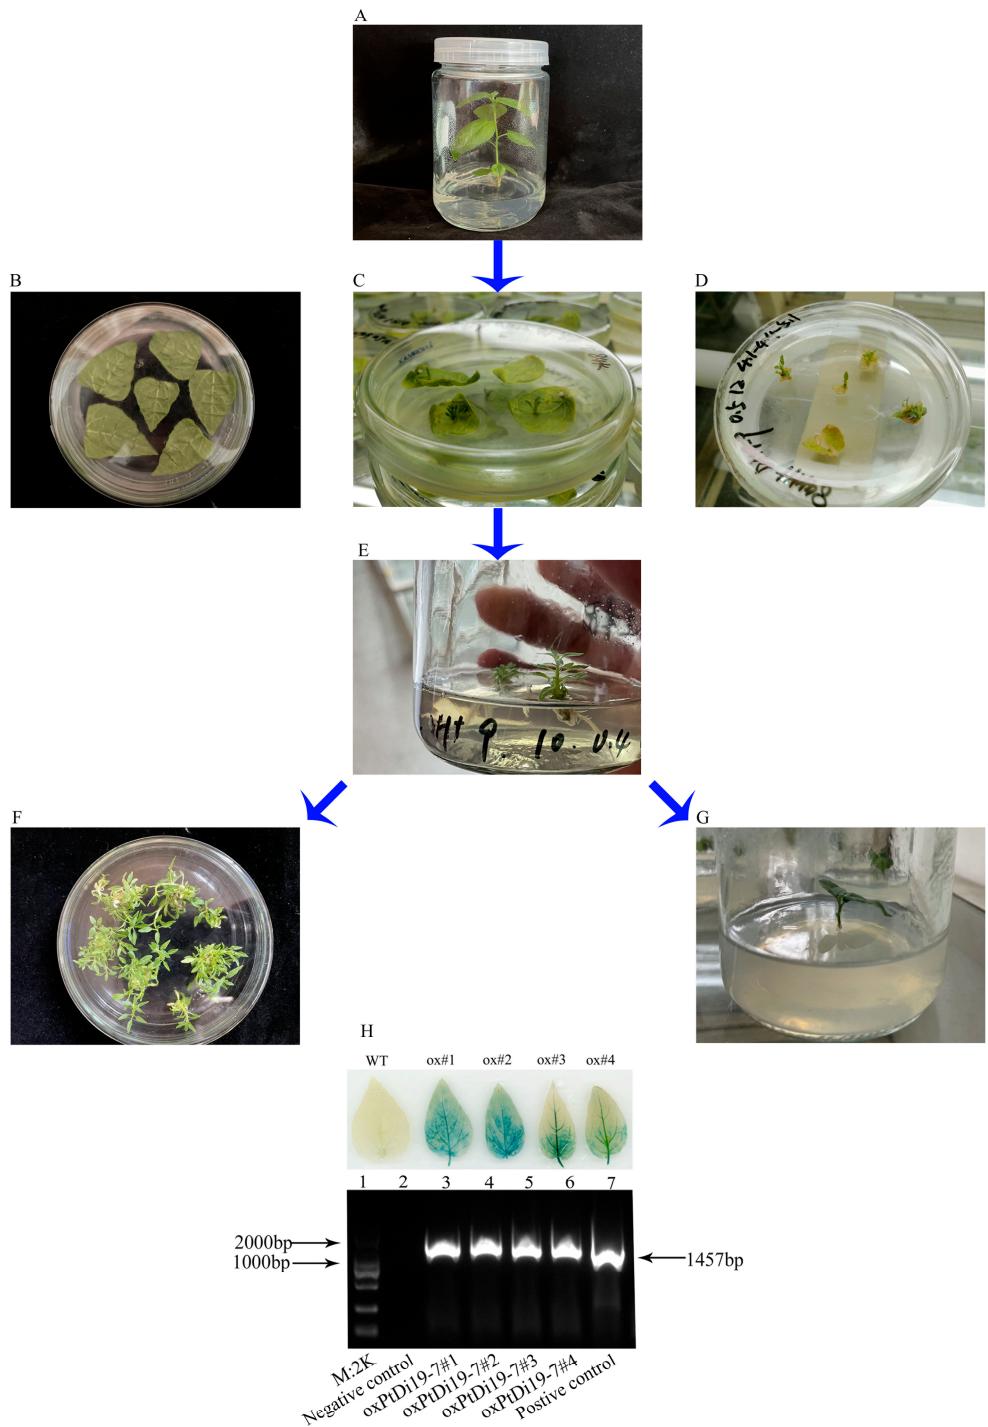

**Figure S2.** Various cis-acting elements in *PtDi19* genes. **(A)** The number of cis-acting elements in response to various factors. **(B)** The number of occurrences of each cis-acting elements.

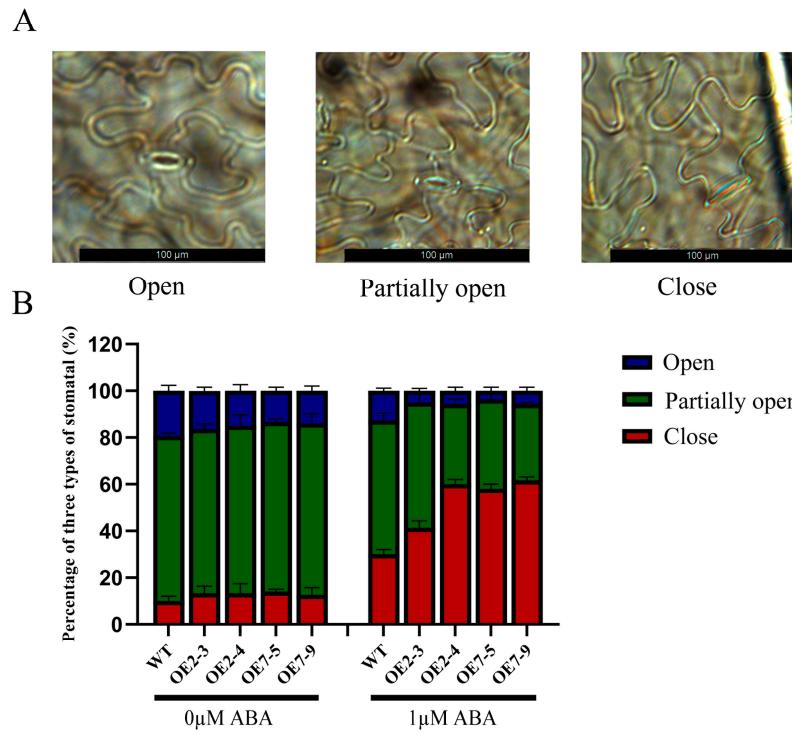

**Figure S3.** Motif of Di19s in seven species. 20 motifs identified by MEME. Each motif presented with a different-colored box and numbered 1-20 (color Figure online).

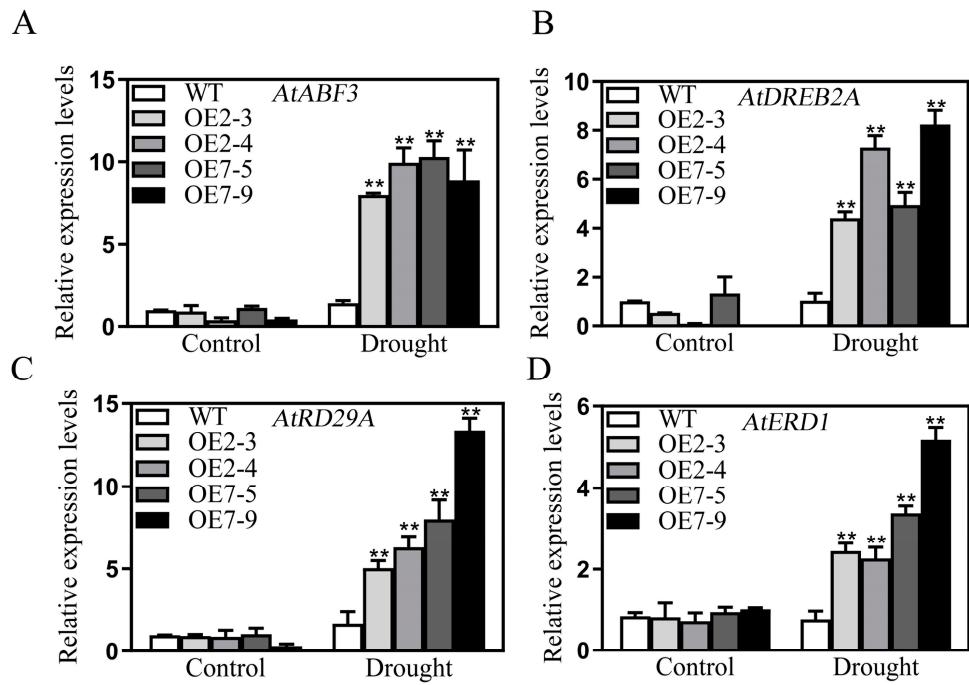

**Figure S4.** Identification of *PtDi19-2* and *PtDi19-7* transgenic *Arabidopsis*.

**Figure S5.** Acquisition and validation of *PtDi19-7* positive plants. **(A)** One-month old tissue culture plantlets of wild-type poplar 84K. **(B)** After infection, 84K poplar leaves were put into co-culture medium for dark culture. **(C)** After three days of dark culture, the leaves were placed into screening differentiation medium. **(D)** The differentiated buds were placed in bud elongation medium. **(E)** The elongated buds were placed in the screening rooting medium. **(F)** Put the leaves into the propagation medium for differentiation. **(G)** The stem segments were inserted into the rooting medium for propagation. **(H)** The four lines were identified by GUS staining and PCR.

**Figure S6.** ABA-induced stomatal closure in transgenic *Arabidopsis*. **(A)** Scanning electron microscopy images of three types of stomatal apertures. **(B)** The percentage of three types of stomatal apertures in the leaves of transgenic and WT plants under normal and 1  $\mu$ M ABA treatment.

**Figure S7.** Expression of ABA/drought-related genes of *PtDi19-2* and *PtDi19-7* overexpression in *Arabidopsis*. The transcript levels of *AtABF3* **(A)**, *AtDREB2A* **(B)**, *AtRD29A* **(C)** and *AtERD1* **(D)** measured by qRT-PCR under unstressed conditions or drought treatment for 10 d. \*\*  $p < 0.01$ .

**Table S1.** Drought-induced 19 (Di19) identified in *P. trichocarpa* and collected about related physical information.
