

# Intestinal Flora Changes Induced by a High-Fat Diet Promote Activation of Primordial Follicles through Macrophage Infiltration and Inflammatory Factor Secretion in Mouse Ovaries

## Supplementary Figure and Figure Legend

**Figure S1.** HFD induces the overactivation of primordial follicles in an HFD-induced obesity mouse model. **(a)** Average body weight after 12 weeks of ND ( $n = 19$ ) or HFD diet ( $n = 20$ ). **(b)** Representative H&E staining images and follicle number counts showing that the primordial follicle pool in HFD mice was significantly decreased compared to ND mice. Black arrows represent the primordial follicles. Scale bar =  $100\mu\text{m}$ . \*  $P < 0.05$ .

**Table S1.** Primer sets used in this study.
