

Supplementary Figure S2

Supplementary Figure S2. The effect of compounds **1**, **2**, **3**, **5**, **7** and cisplatin (CDDP) on proliferation of HOS (A, B, C, D, E and F, respectively) and Saos-2 (G, H, I, J, K and L, respectively) cells. Cells were treated with compounds at indicated concentrations for 96 hours. The cell proliferation was established by means of MTT assay. The results are mean values $\pm$ SD of at least three independent experiments. Statistically significant differences: * - at $p < 0.05$, ** - at $p < 0.01$ and *** - at $p < 0.001$ in comparison to the untreated cells (one-way ANOVA followed by Dunnett's post-hoc test).
