

Figure S4. Learning and long-term memory abilities of *cn¹* mutant.

X axis: the age where training was performed (days), Y axis: learning indices (LI), %. 0D – immediately after training (learning), 2D – 2 days after training, 8D – 8 days after training. Statistical differences: ^ from *cd¹*; \$ from 0D; @ from 2D; * from zero (two-sided randomization test; $p < 0.05$, $n = 20$).
