

Figure S2. Relative expression levels of 2AP synthesis pathway related genes in soybean grain. Green column: ZX8 (non-aromatic soybeans), violet column: ZK1754 (aromatic soybeans). S1, S2, S3, S4, S5, S6 for soybean grains correspond to 15, 20, 25, 30, 35, 40 days after anthesis. * Indicates significance at the $p < 0.05$ level, ** indicates significance at the $p < 0.01$ level.
