

Table S1. CD markers in MSC expression.

positive marker	negative marker
CD73	CD11b
CD90	CD19
CD105	CD31
	CD34
	CD45
	HLA-DR

Figure S1. Bar graphs show the relative cell viability of all individual ADSC donors in different groups at 24 - 72 h. The assay was performed in technical triplicates.
