Supplementary Table S2. Number of differentially expressed metabolites among groups.

Treatment groups	Differentially metabolites	Down-regulated	Up-regulated
IISS vs WT	281	223	58
SS vs WT	371	130	241
LL vs WT	309	225	84

Note: WT: Wild type, IISS: *E. indica* population with mutation of Thr102Ile + Pro106Ser in EPSPS; LL: *E. indica* population with mutation of Pro106Leu in EPSPS; SS: *E. indica* population with mutation of Pro106Ser in EPSPS. Differential metabolites were screened based on variable importance in projection (VIP) values > 1 and a false discovery rate < 0.05.
