

Supplementary Materials:

Supplementary Table S1: Differentially expressed miRNAs detected by NGS analysis in sera from STEMI patients *versus* patent controls. Fold change and log2 fold change values, as well as *p*-values are shown for each of the 15 miRNAs. NGS: Next Generation Sequencing; RPM: reads per million; STEMI ST-elevation myocardial infarction.

miRNA	mean	log2 fold	Fold	<i>p</i> Value
	expression	change	Change	
	(RPM)			
hsa-miR-1-3p	285.58	1.78	3.44	0.0023
hsa-miR-150-5p	14736.14	1.19	2.28	0.0031
hsa-miR-483-5p	1259.12	-0.97	0.51	0.0041
hsa-miR-1229-5p	92.82	3.51	11.38	0.0064
