This PDF file includes:

Figures S1 to S14
Tables S1 to S3

Figure S1. Bar chart of the percentage of analyzed genomes sequenced for each country.

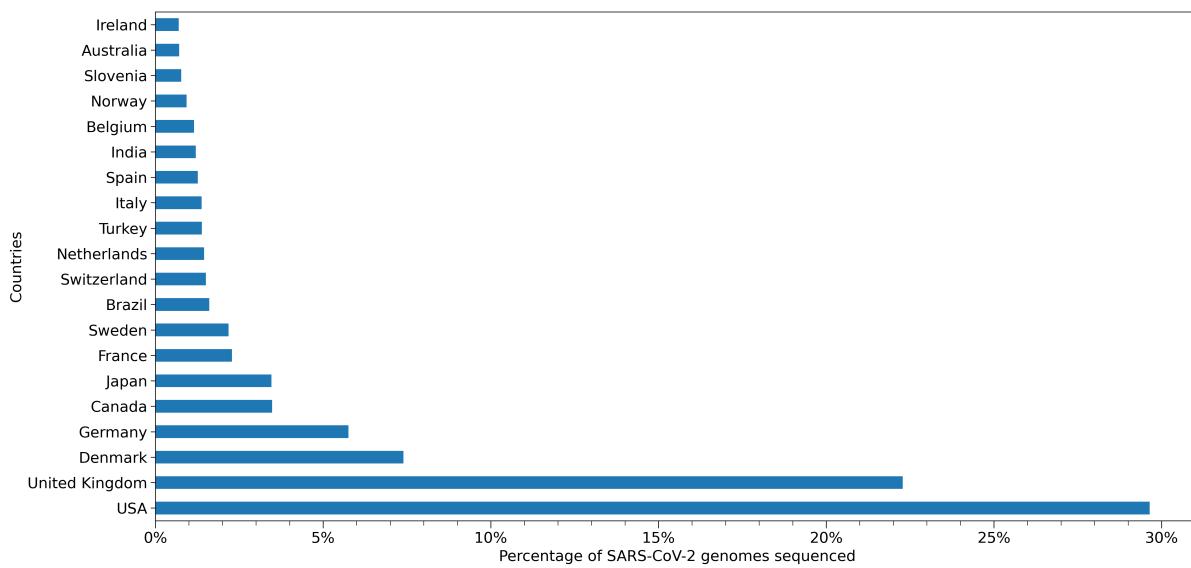

Figure S2. Mean number of SNVs per genome and week.

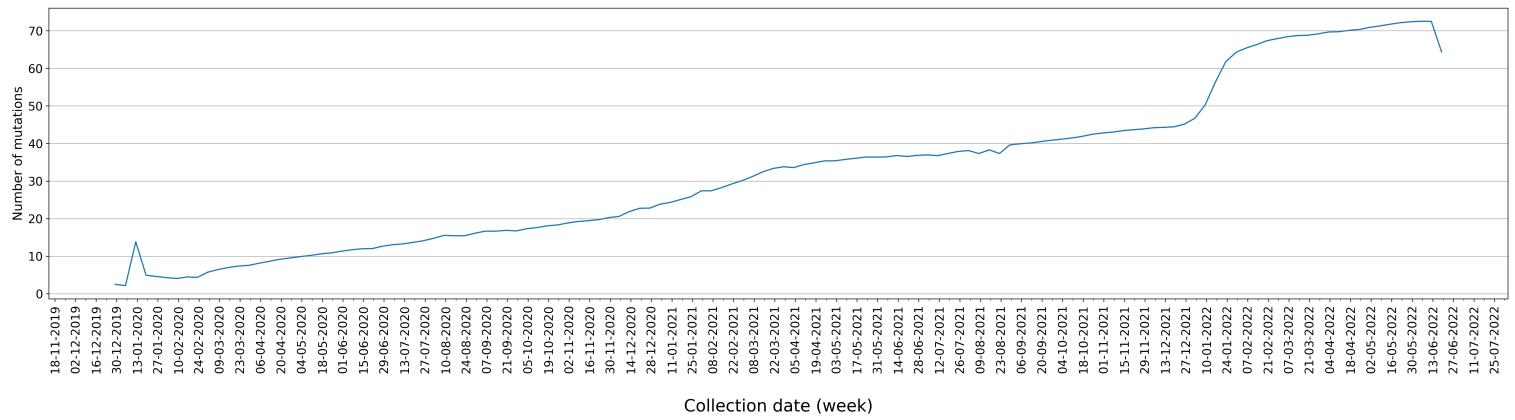

Figure S3. Mean number of deletions per genome and week.

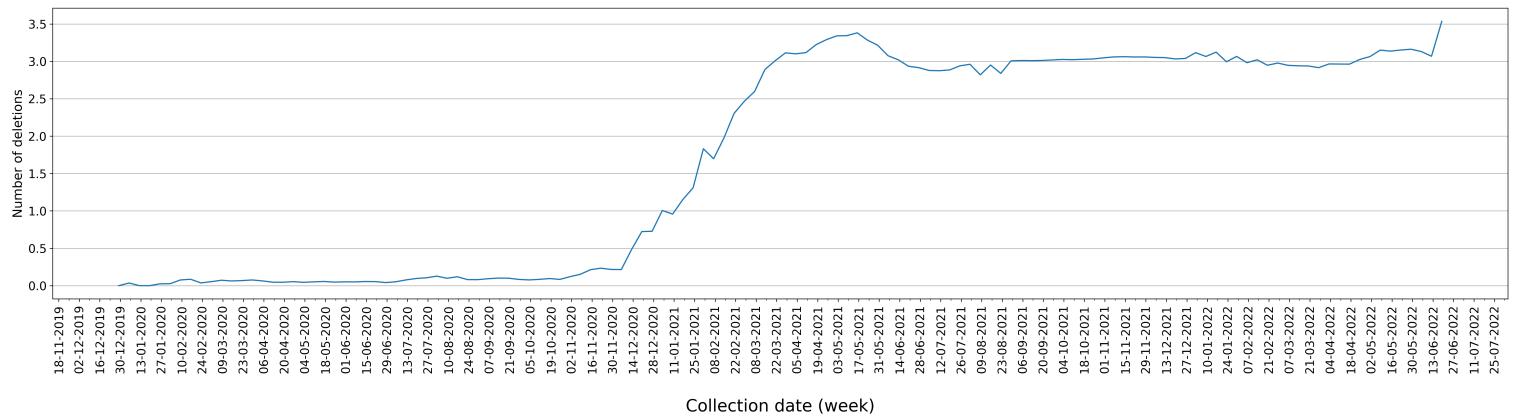

Figure S4. Mean number of insertions per genome and week.

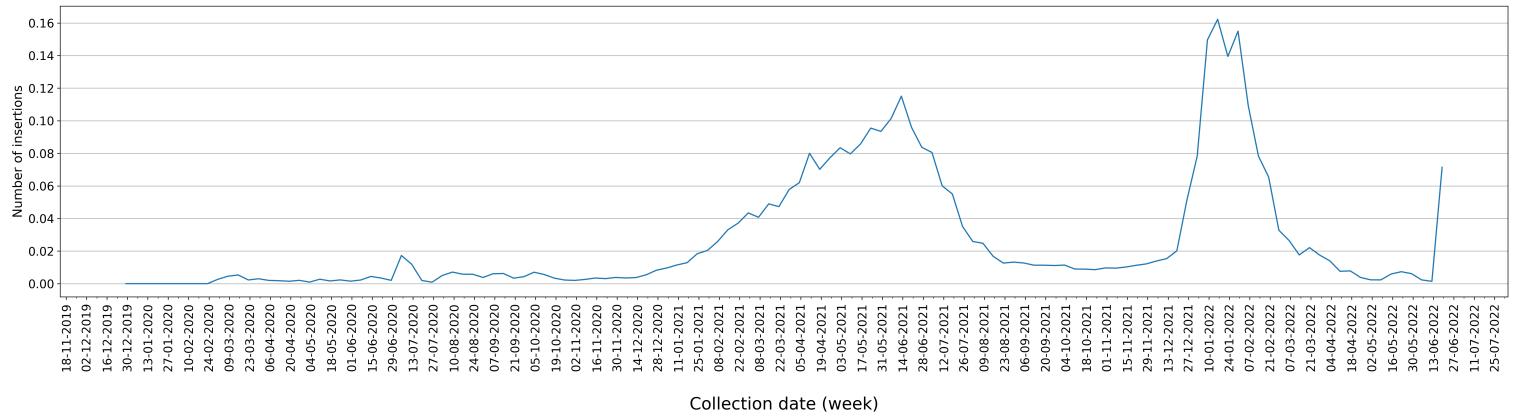

Figure S5. Histogram of the length of deletions in SARS-CoV-2 genomes. Only deletions with a relative frequency greater than 10% were analyzed.

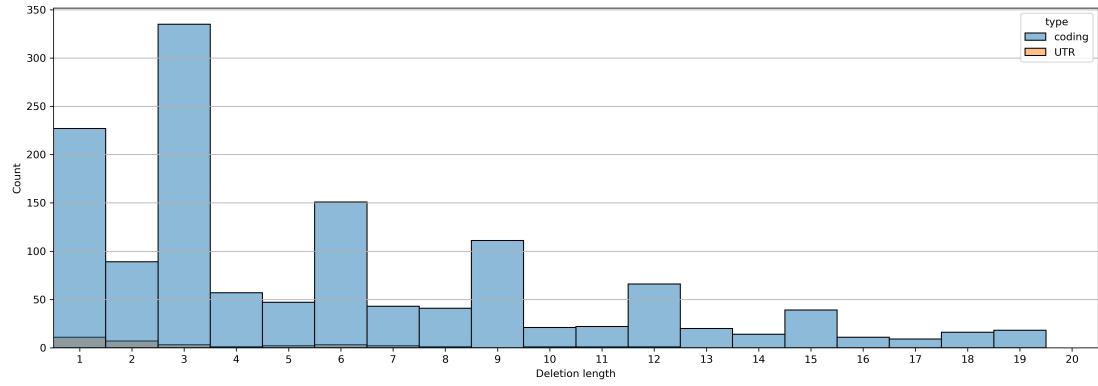

Figure S6. Histogram of the length of insertions in SARS-CoV-2 genomes. Only deletions with a relative frequency greater than 10% were analyzed.

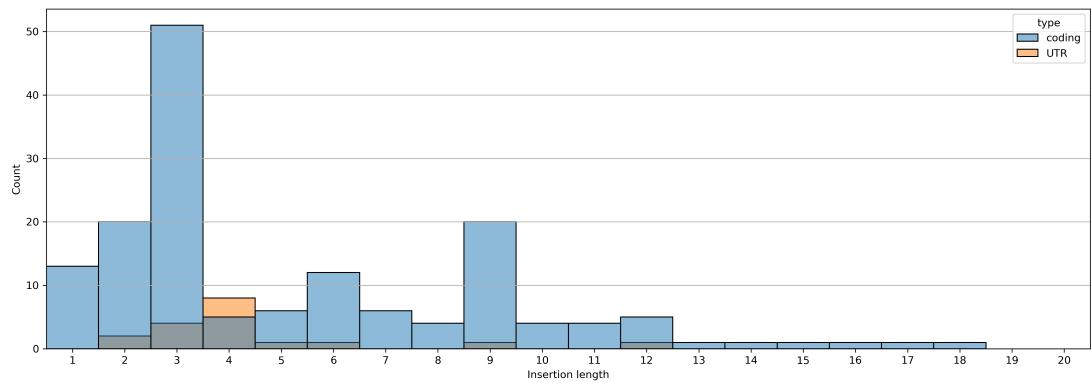

Figure S7. Box plots of the relative frequency of SNV types.

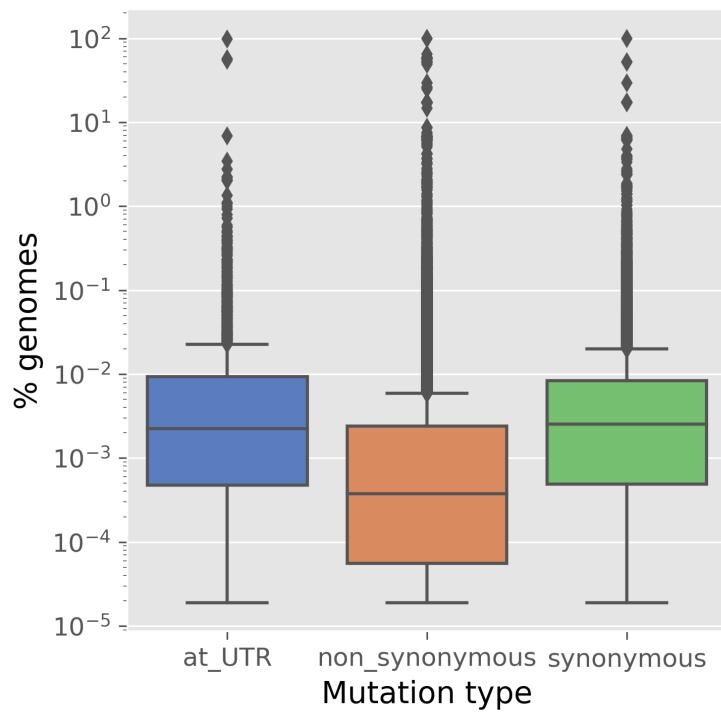

Figure S8. Histogram of the percentage of SNVs found in a given number of genomes.

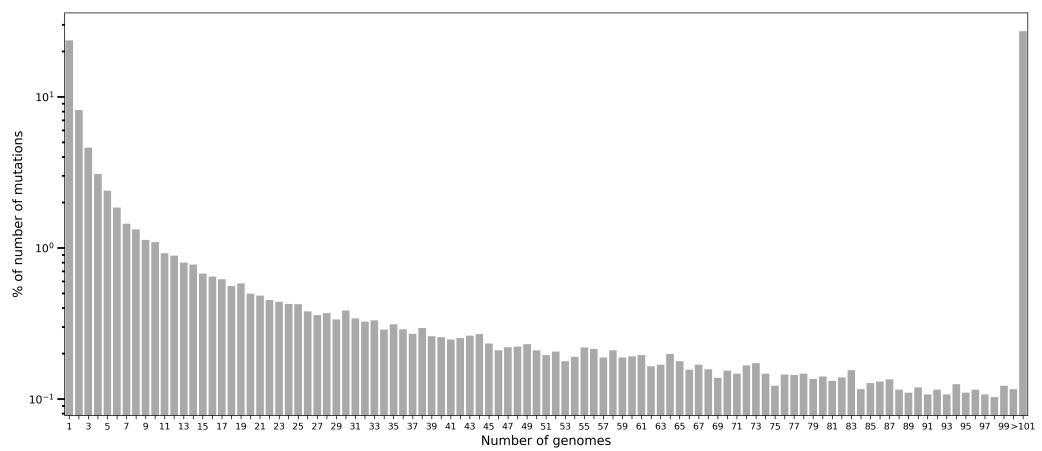

Figure S9. Lollipop plots of the most frequent mutations in each SARS-CoV-2 gene. Synonymous, non-synonymous and UTR mutations are shown in green, dark orange and blue, respectively. Deletions are shown in purple.

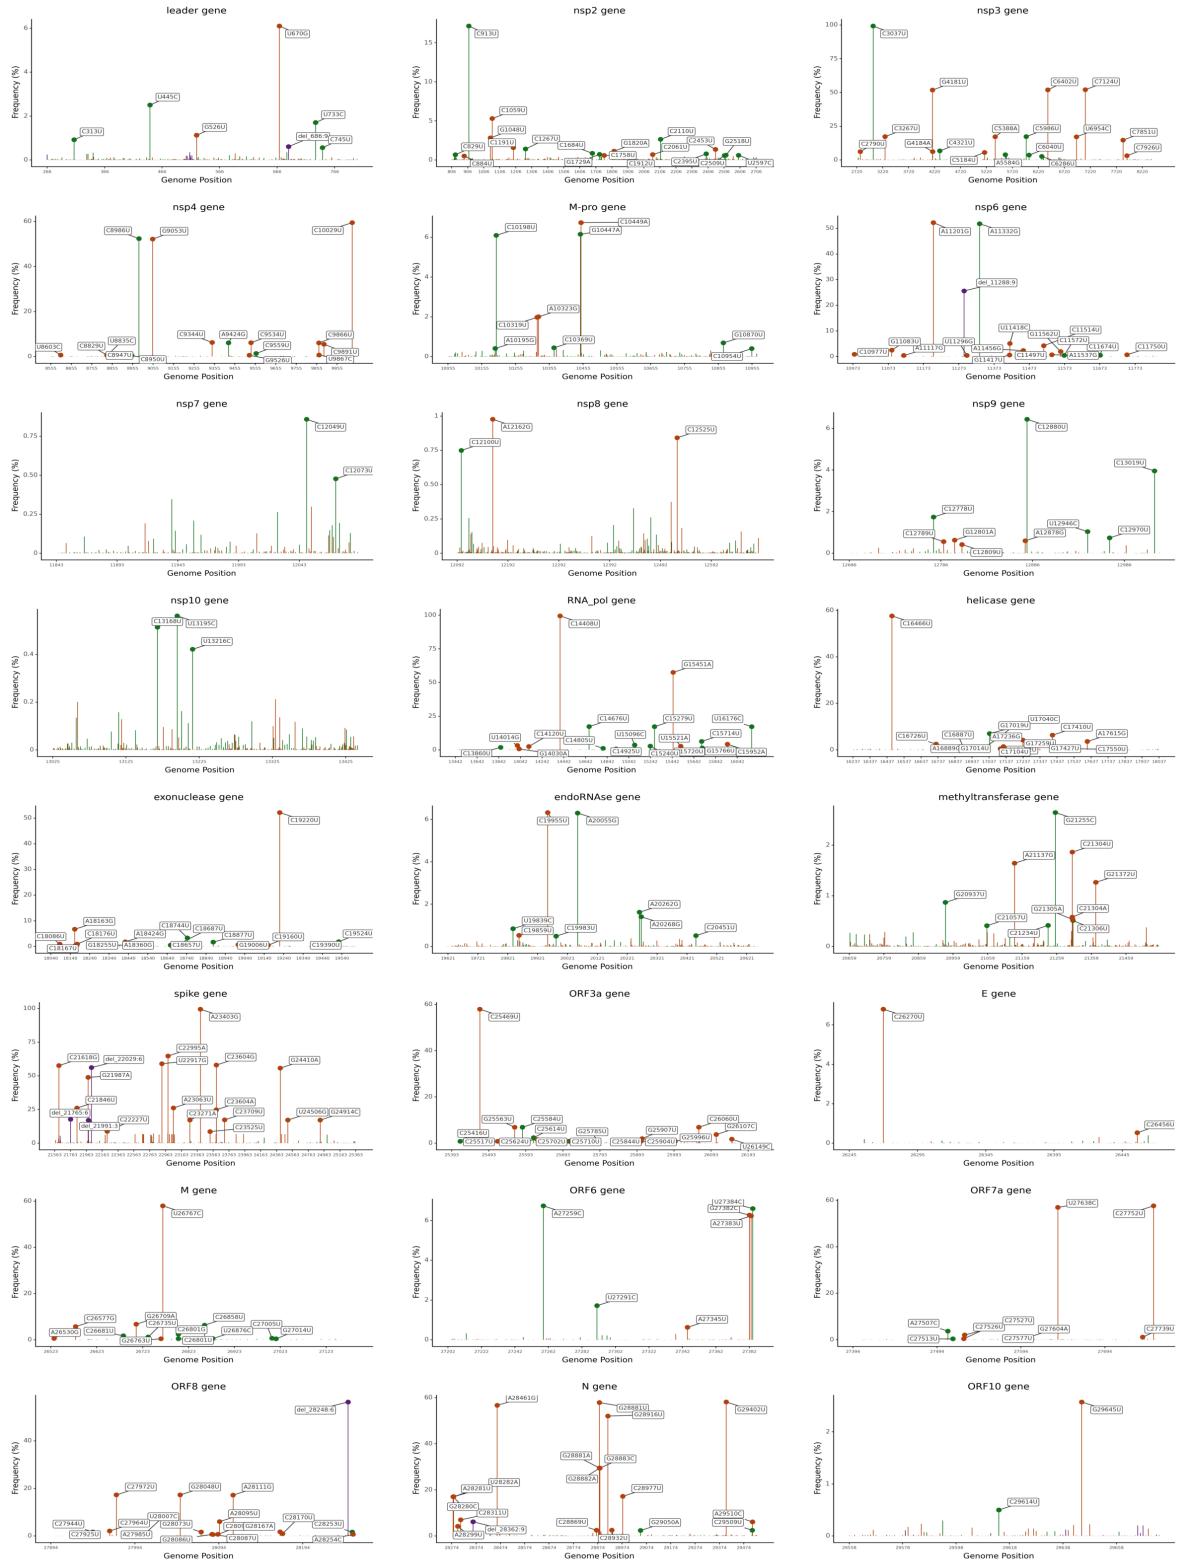

Figure S10. Box plots of the frequency (A), number of pangolin lineages (B), number of countries (C) and number of variants (D) of SNV types.

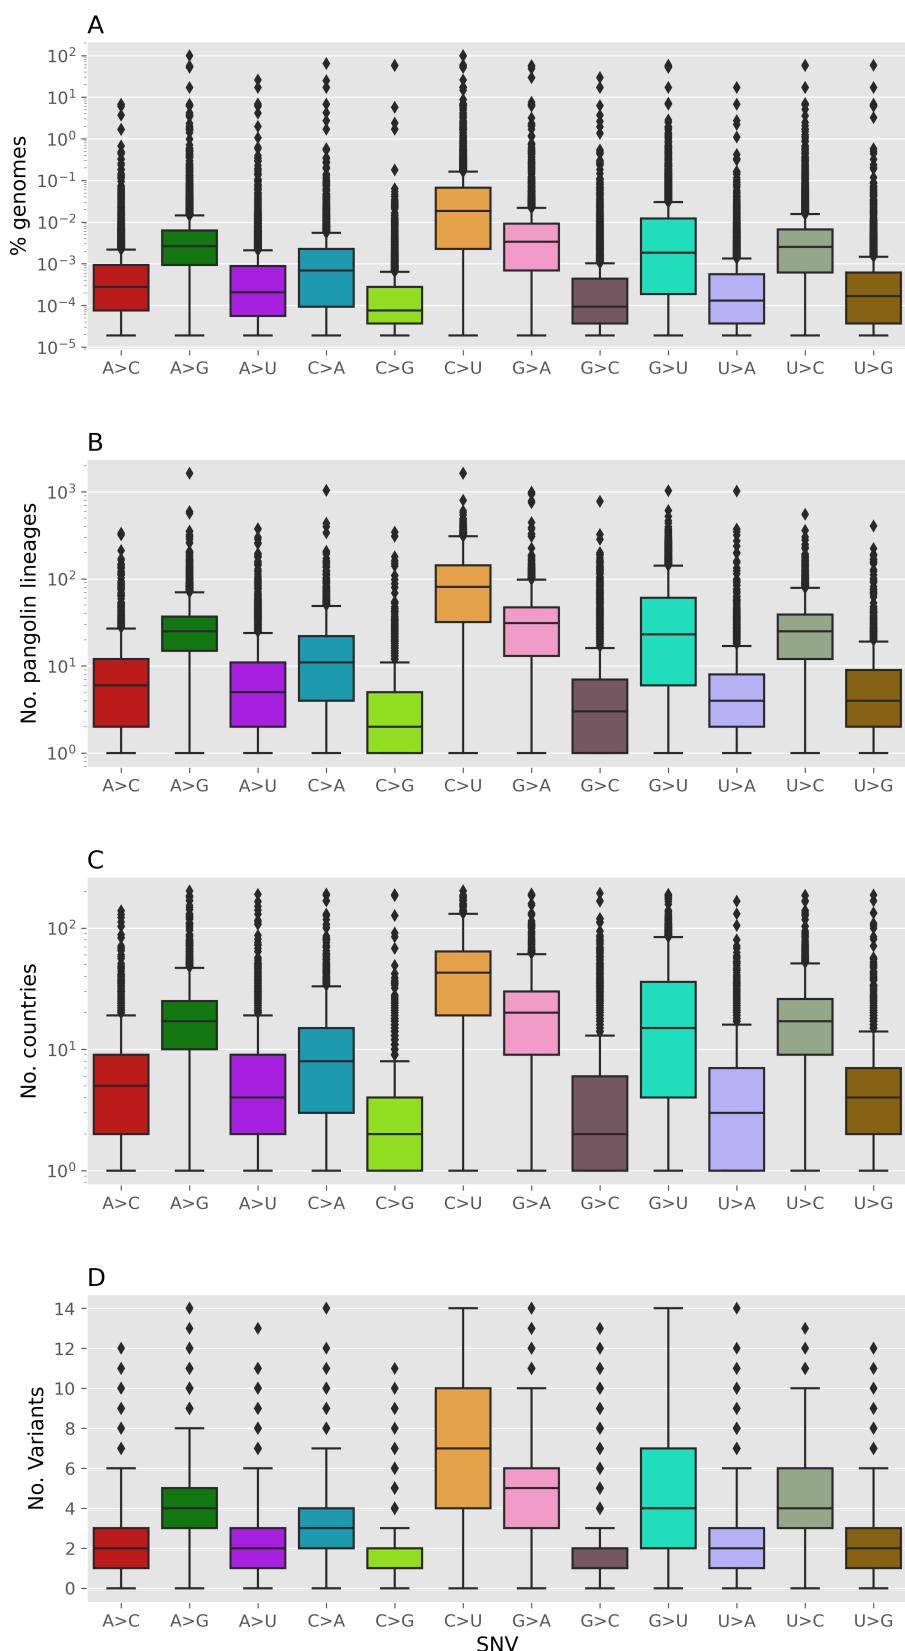

Figure S11. Box plots of the frequency (%) of the mutations found in SARS-CoV-2 regions that hybridize with probes and forward and reverse primers from some COVID-19 diagnostic PCR tests.

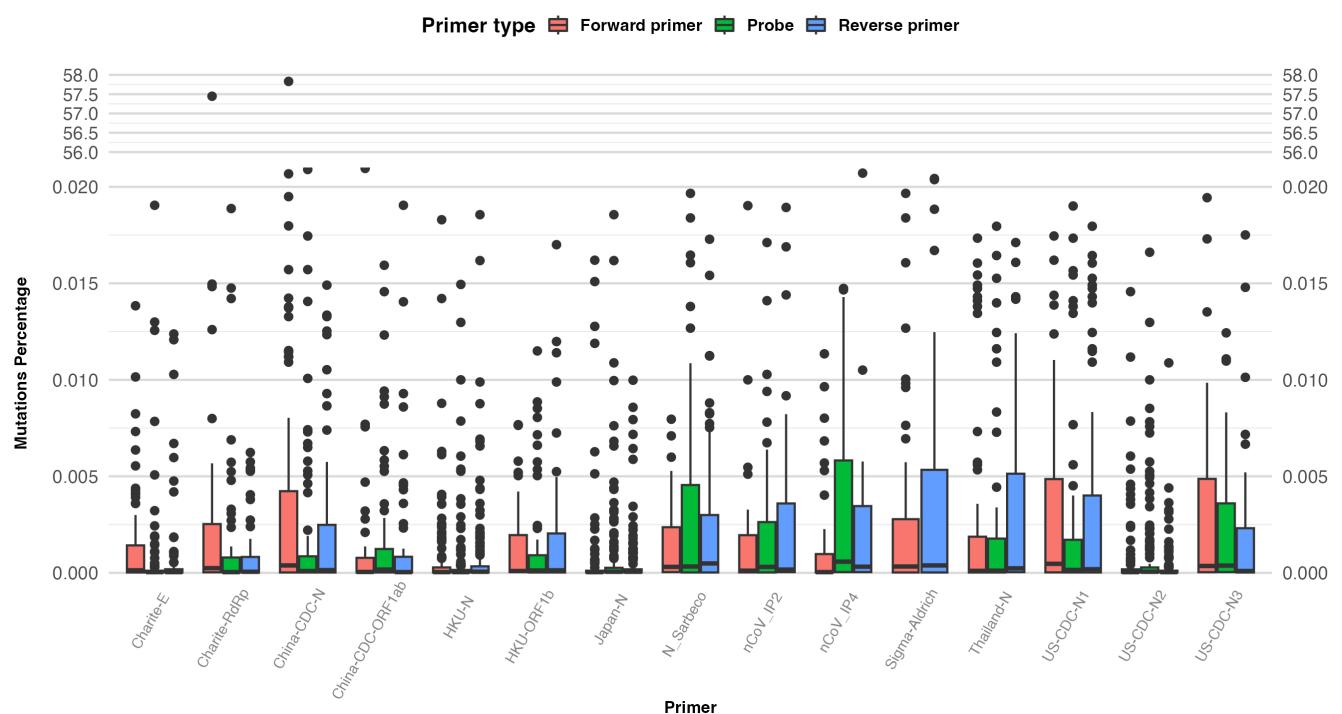

Figure S12. Search engine of the SARS-CoV-2 mutation portal at <http://sarscov2-mutation-portal.urv.cat/>

The screenshot shows the search filter section of the SARS-CoV-2 mutation portal. At the top, there is a navigation bar with links for Home, Info, About, Genes, Mutations (which is highlighted in red), and a note that it is "Enabled by data from **GISAID**".

Search filter

Three main filter categories are displayed in separate columns:

- Select your gene:** A dropdown menu showing "All".
- Select your countries:** A dropdown menu showing "All".
- Select your Mutation type:** A dropdown menu showing "All".

Below these are two more filter sections:

- Select your Percentage found:** A dropdown menu showing "All".
- VOC:** A dropdown menu showing "All".
- A **search** button.

At the bottom, there are two date range filters:

- Date first found:** Includes "date from:" (dd / mm / aaaa) and "date to:" (dd / mm / aaaa).
- Date Last found:** Includes "date from:" (dd / mm / aaaa) and "date to:" (dd / mm / aaaa).

Figure S13. Results of a search of the SARS-CoV-2 mutation portal at <http://sarscov2-mutation-portal.urv.cat/>

Figure S14. Scatter plot of the above search

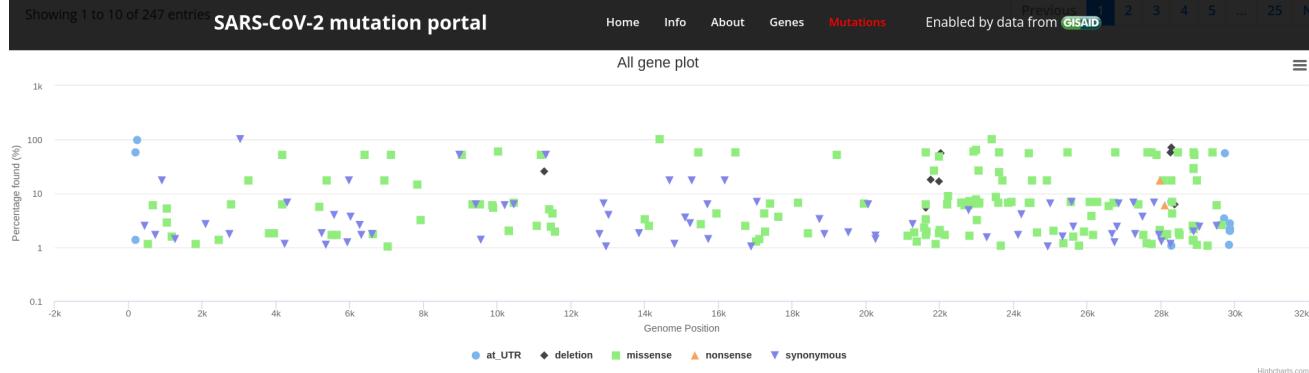

Table S1. Distribution by continent of the 5,340,569 SARS-CoV-2 genomes analyzed.

Continent	Genomes sequenced	Percentage (%)
Europe	2,942,990	55.1
North America	1,819,981	34.1
Asia	371,704	7.0
South America	126,872	2.4
Oceania	44,942	0.8
Africa	34,080	0.6

Table S2. Number of different SNVs, insertions and deletions found in the 5,340,569 SARS-CoV-2 genomes analyzed.

Mutation	Total number ¹	Coding regions	UTRs
SNVs	73,464	71,622	1842
deletions	21,712	21,464	248
insertions	1820	1700	120

¹Number of different SNV, deletions or insertions

Table S3. Mutations found in SARS-CoV-2 regions that hybridize with probes and forward and reverse primers from some COVID-19 diagnostic PCR tests.
