

Factor loadings

	D. anglica		*D. intermedia*		*D. rotundifolia*	
Factor / Trait	1	2	1	2	1	2
pH	0.740	-0.499	0.830	0.345	0.767	0.342
Conductivity	-0.848	-0.181	-0.327	-0.755	-0.688	-0.341
Temperature	0.346	0.717	-0.538	0.549	0.080	0.751
PAR light intensity	-0.741	0.513	-0.111	0.576	-0.013	0.858
Hydration	0.610	0.170	-0.945	0.060	-0.911	0.294
Organic matter	0.524	0.466	-0.957	0.122	-0.925	0.301

Figure S1. Factors differentiating habitat conditions of sundews according to factor analysis and factor loadings based on correlations of environmental traits with factors 1 and 2.

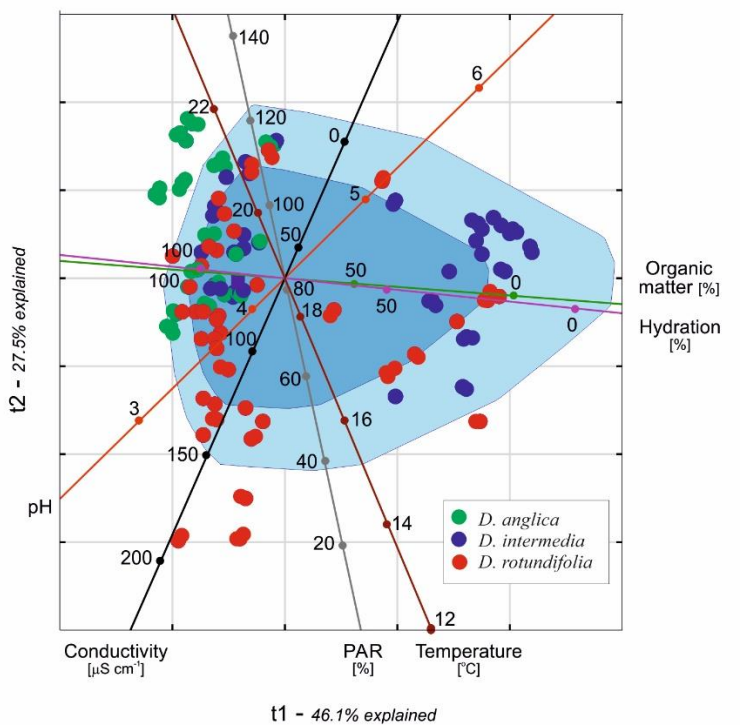

Figure S2. Variation in environmental conditions of *Drosera* according to Partial Least Squares (PLS) analysis.
