

Supplementary Material

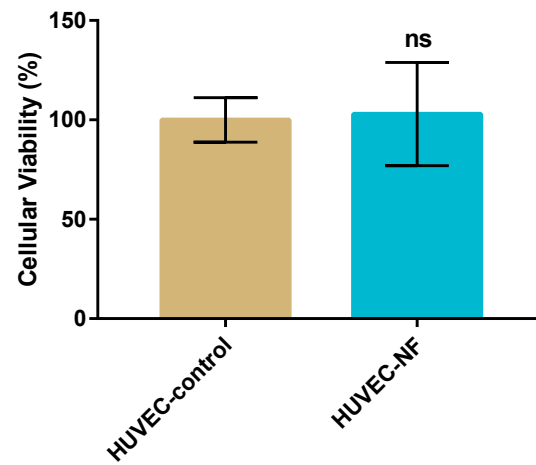

Figure S1. CCK8 assay was used to assess the effect of NF (100 μ M, 24 h) on HUVEC cell viability. NF, nuciferin. ns, no significance.

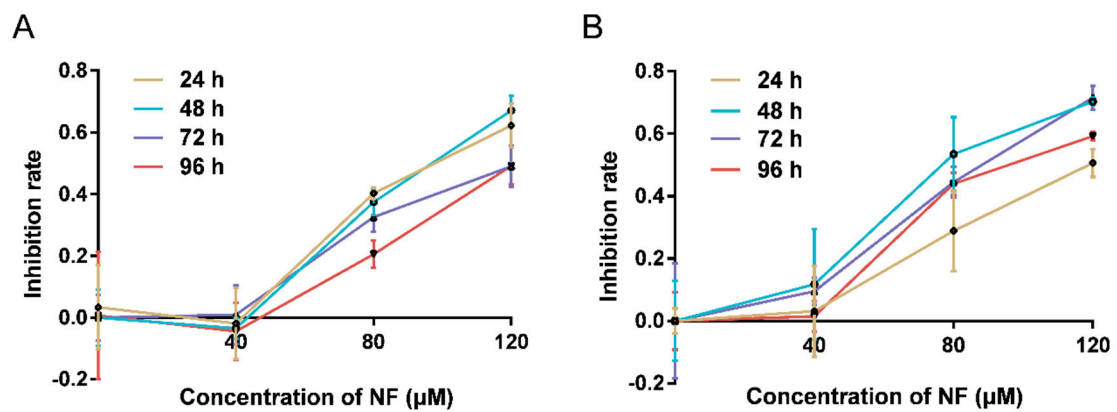

Figure S2. (A, B) CCK8 assay was used to assess inhibition rates in SCC25 and CAL27 cells treated with NF (0~120 μ M, 0~96 h). NF, nuciferin.
