

Supplementary Figures

Supplementary Figure S1. Mitochondrial marker levels did not differ significantly between the treatment groups on the contralateral side, except for TFAM, which was elevated in mice treated with formoterol 0.3 mg/kg for 2 weeks. $t(9.935)=2.940$, $*p=0.0149$, unpaired two-tailed t-test with Welch's correction. $n=4-6$. Data presented as mean \pm SD.
