

FigureS1. The correlation analyses between shoot apices or inflorescences of pineapple. The blue was darker, indicating a stronger correlation.

FigureS2. Heatmaps of differentially accumulated metabolites (DAMs).

Figure S3. Heatmaps of DAMs in common.

FigureS4. The correlation analyses between shoot apices or inflorescences of pineapple. The blue was darker, indicating a stronger correlation.

Table S1. The metabolites of shoot apices or inflorescences.

Table S2. Summary of pineapple transcriptome.

Table S3. GO enrichment of DEGs.

Table S4. The primers of qRT-PCR.
