

**Supplementary Table S1.** Pathways shared between all patient groups in the MEN1 pituitary analysis. P-values for the pathway in each group are stated. Genes with non-neutral variants for each patient group are listed. Genes that repeatedly contributed to the identification of pathways are mentioned on a shaded background. In brackets, the frequencies of variant alleles [GnomAD, non-Finnish European population] identified in the genes are presented.

Pathway - identifier	Family A	Patient X5	Patient X15
Alzheimer's disease - WP5124			
	P=0.0335 <i>KIF5C</i> (0.0018)	P=0.0671 <i>APOE</i> (0.0767)	P=0.1524 <i>CACNA1F</i> (0.0247)
