

Supplementary Figures

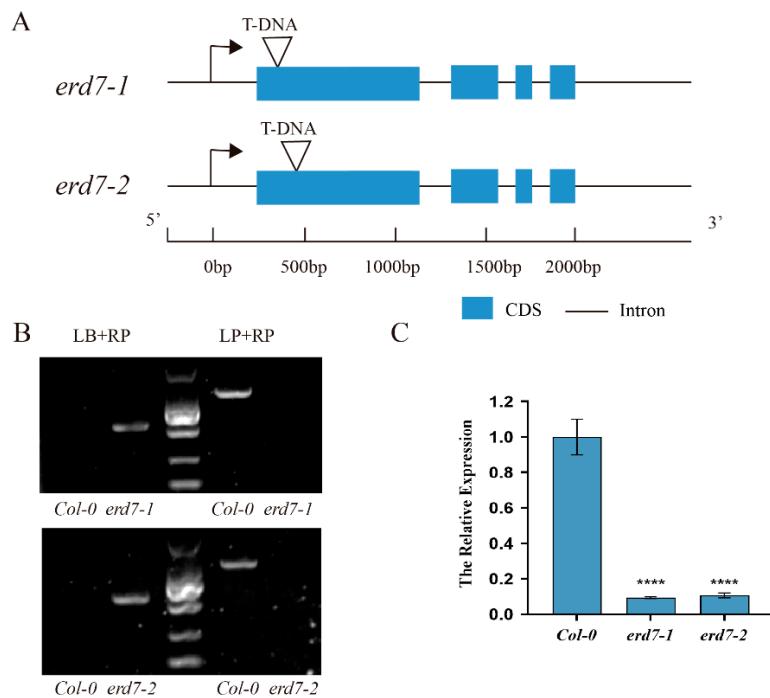

Figure S1. Generation and characterization of ERD7 transgenic Arabidopsis mutant lines. (A) Schematic representation of the gene structure and T-DNA insertion of the two mutant lines of ERD7 (B) Verification of purity of erd7 mutant by triple priming method (C) The relative expression levels of ERD7 in Mutant lines.

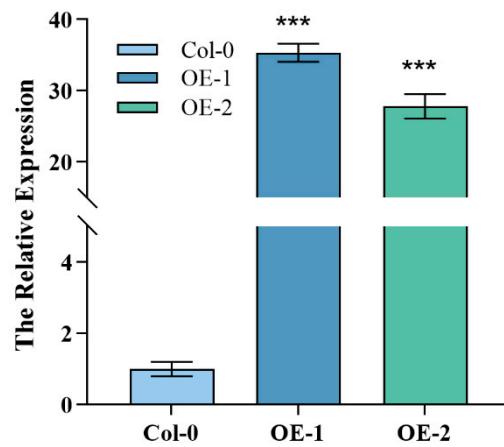

Figure S2. The relative expression levels of ERD7 in overexpression lines.

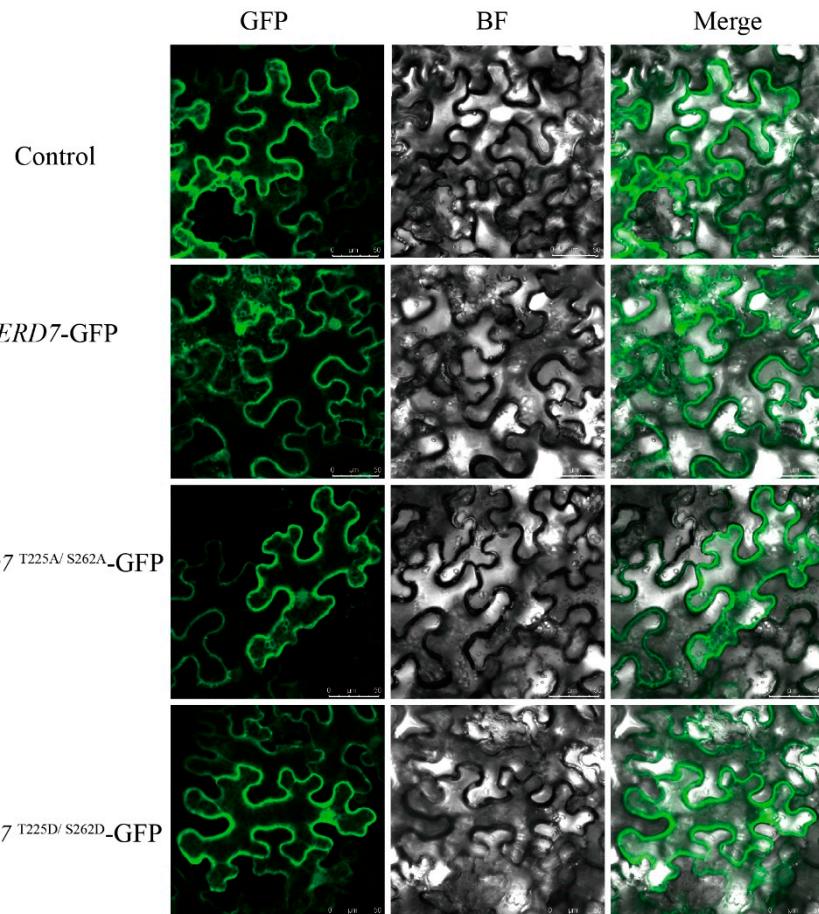

Figure S3. Subcellular localization analysis of ERD7 and ERD7 phosphorylation sites after mutation.

Table S1. Identification of ERD7 protein phosphorylation sites by mass spectrometry
