

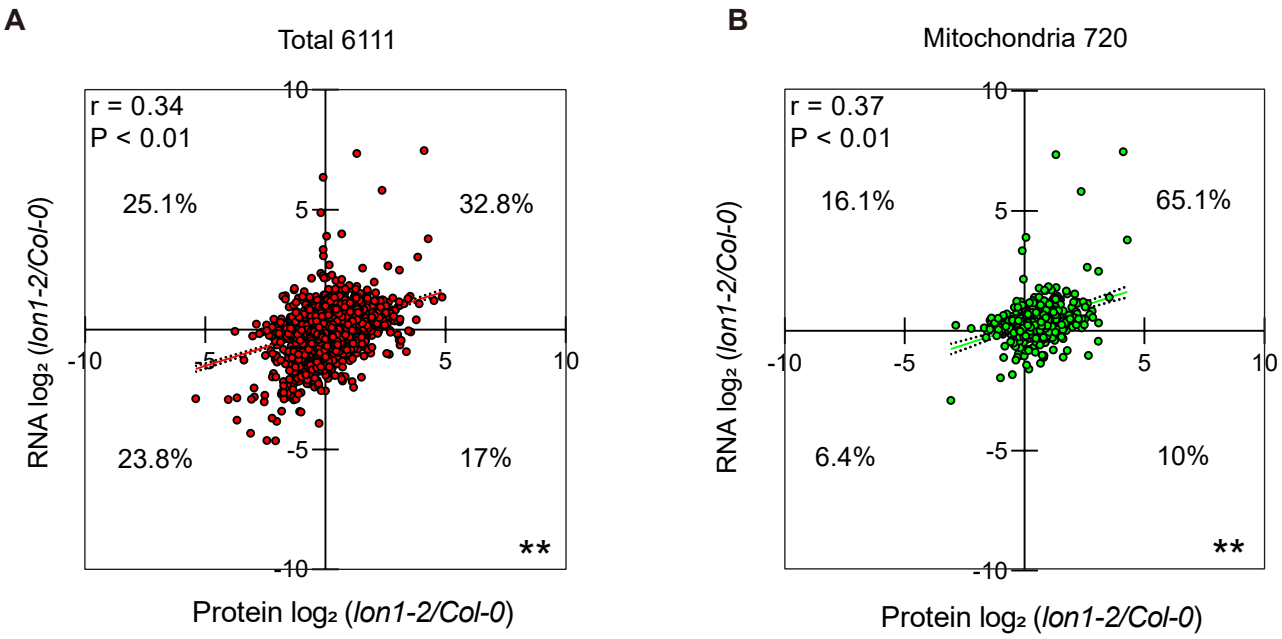

Figure S2. Correlation graphs between transcriptomic and proteomic data in *lon1-2* compared with *Col-0*.

(A) Dot plots visualizing log-transformed data of 6,111 genes for transcriptomic versus proteomic comparison in *lon1-2* mutant line compared with *Col-0*. (B) Dot plots visualizing log-transformed data of 720 mitochondrial genes for transcriptomic versus proteomic comparison in *lon1-2*. The numbers in the top left corner indicate the Pearson correlation coefficients. Statistical significance is denoted by ** for P < 0.01.
