

20 μ L antibiotic (1)

20 μ L antibiotic (2)

20 μ L antibiotic (3)

10 μ L antibiotic (1)

10 μ L antibiotic (2)

10 μ L antibiotic (3)

10 μ L antibiotic + 10 μ L PE (1)

10 μ L antibiotic + 10 μ L PE (2)

10 μ L antibiotic + 10 μ L PE (3)

PE (1)

PE (2)

PE (3)

Supplementary material 3: Mueller-Hinton agar plates for the antibacterial activity of PE and LE against *E. coli*.

PE: pomegranate extract; *LE*: lemon extract

Numbers represent 1) Ciprofloxacin (50 ng/µL); 2) Gentamicin (100 ng/µL); 3) Imipenem (100 ng/µL); 4) Ceftazidime (300 ng/µL); 5) 20 µL PE (0.1 g/mL stock solution); 6) 10 µL PE (0.1 g/mL stock solution); 7) 20 µL LE (0.1 g/mL stock solution); 8) 10 µL PE (0.1 g/mL stock solution). All experiments were performed in triplicate.
