Supplements:

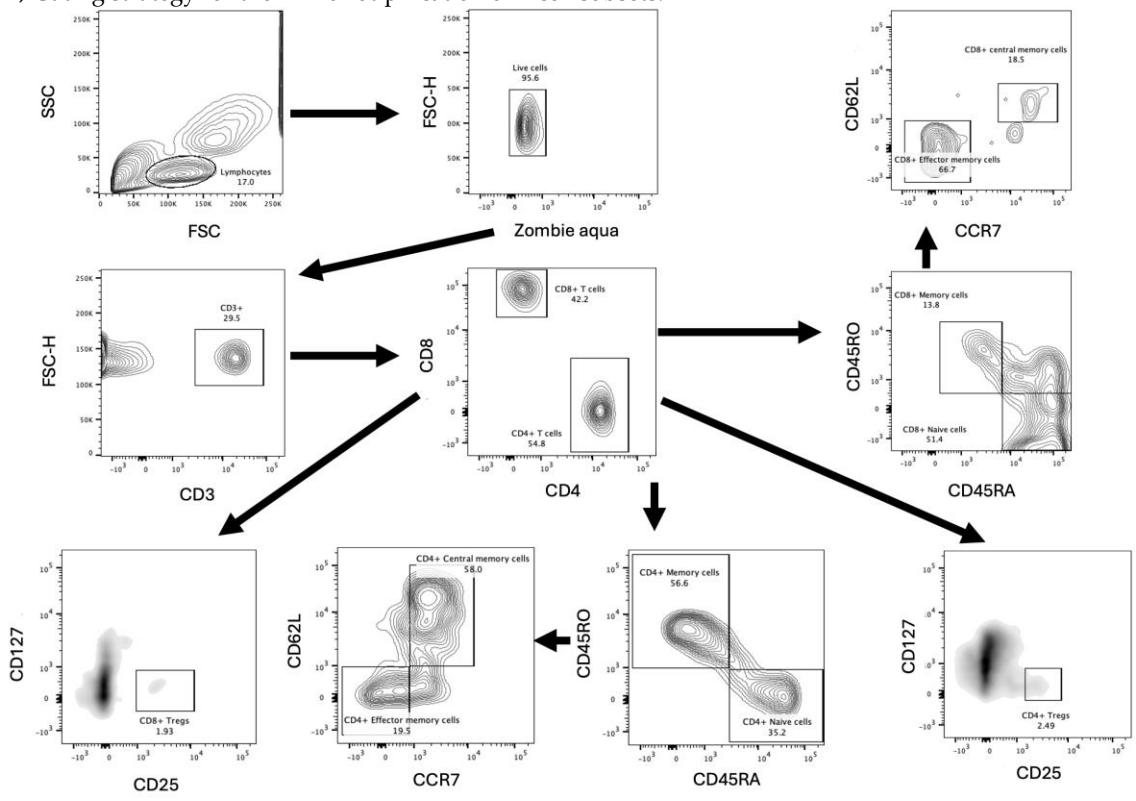

Supplementary Table S1. Most frequent PACS

symptoms. **Symptom**	**Without PACS n=32**	**With PACS n=19**
Confusion	NA	4 (21%)
Cough	NA	7 (36.8%)
Dysnea	NA	7 (36.8%)
Headache	NA	11(57.8%)
Arthralgias	NA	9 (47.3%)
Myalgias	NA	4 (21%)
Cutaneous rash	NA	3 (15.7%)

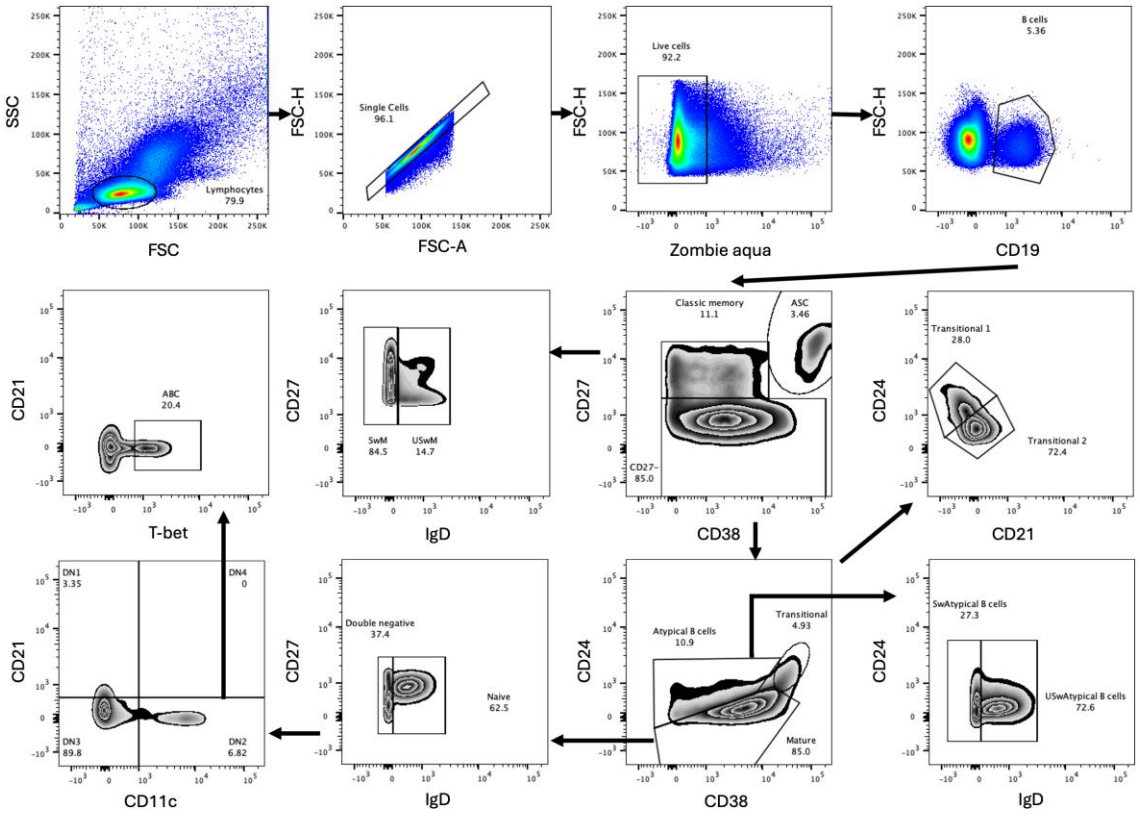

NA: Not applicable, PACS = persistent acute COVID syndrome

Supplementary Figure S1.

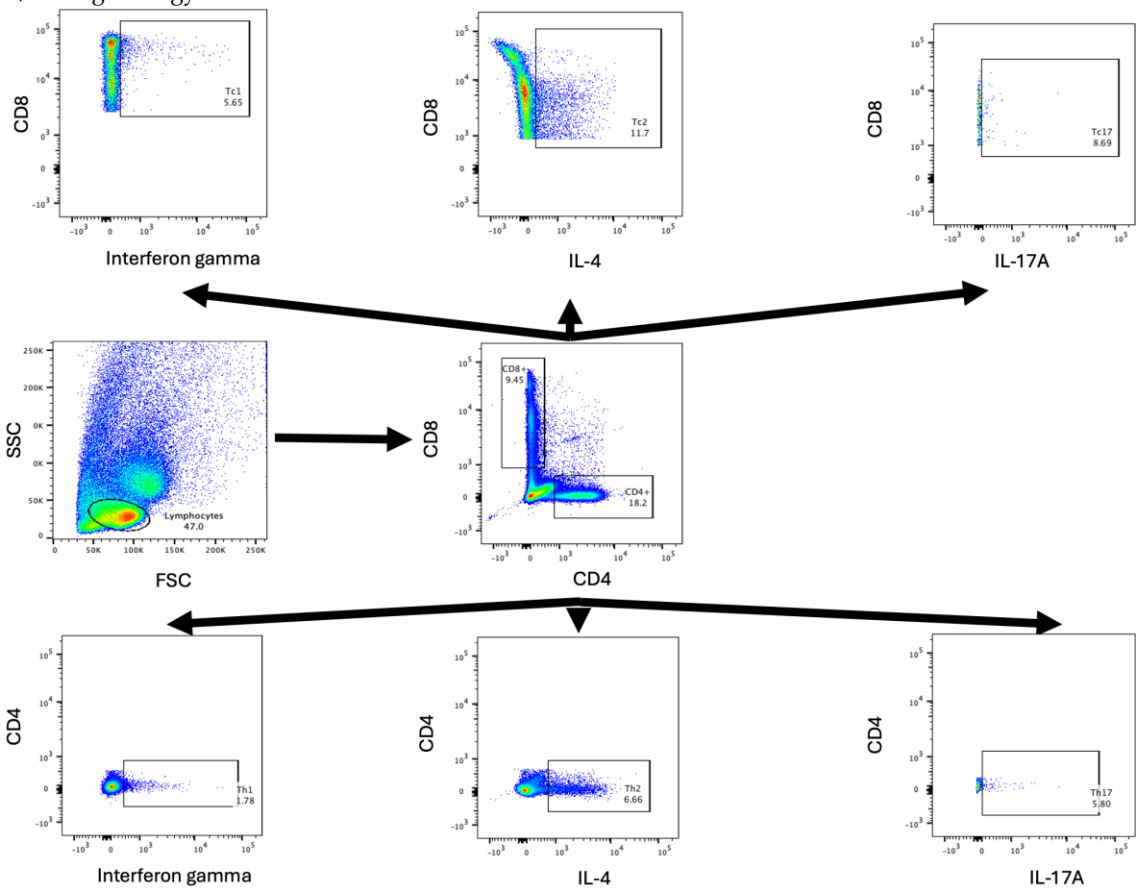

A) Gating strategy for the immunotipification of T cell subsets.

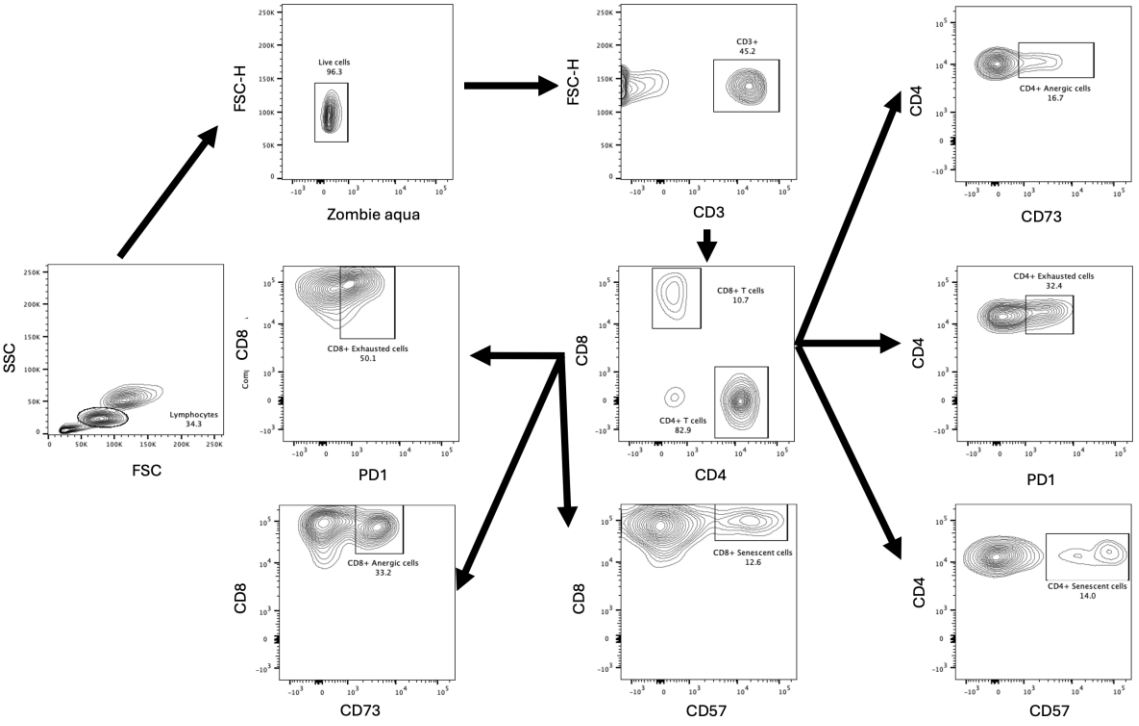

B) Gating strategy for the immunotipification of B cell subsets

C) Gating strategy for the identification of Th and Tc subsets

D) Gating strategy for the quantification of the proportion of exhausted, anergic and senescent T cells

E) Gating strategy for the detection of low-density granulocytes and monocyte subsets
