

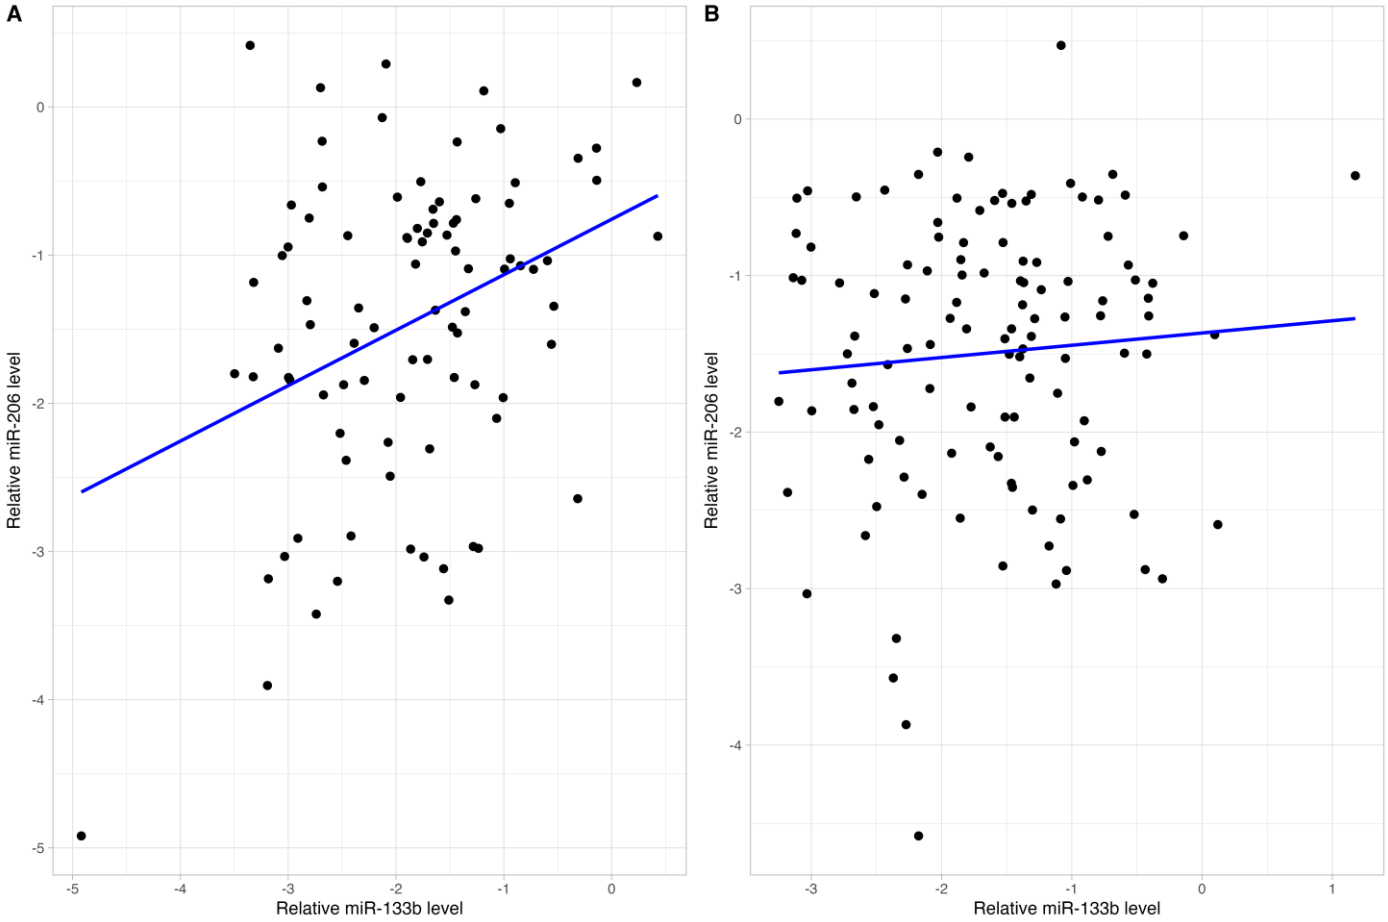

Figure S1. Correlation scatter plot depicting the relationship between the between miR-133b and miR-206 expression levels in (A) the CVD group ($r = 0.341$; $p < 0.001$); and (B) the control group ($r = 0.076$; $p > 0.05$).

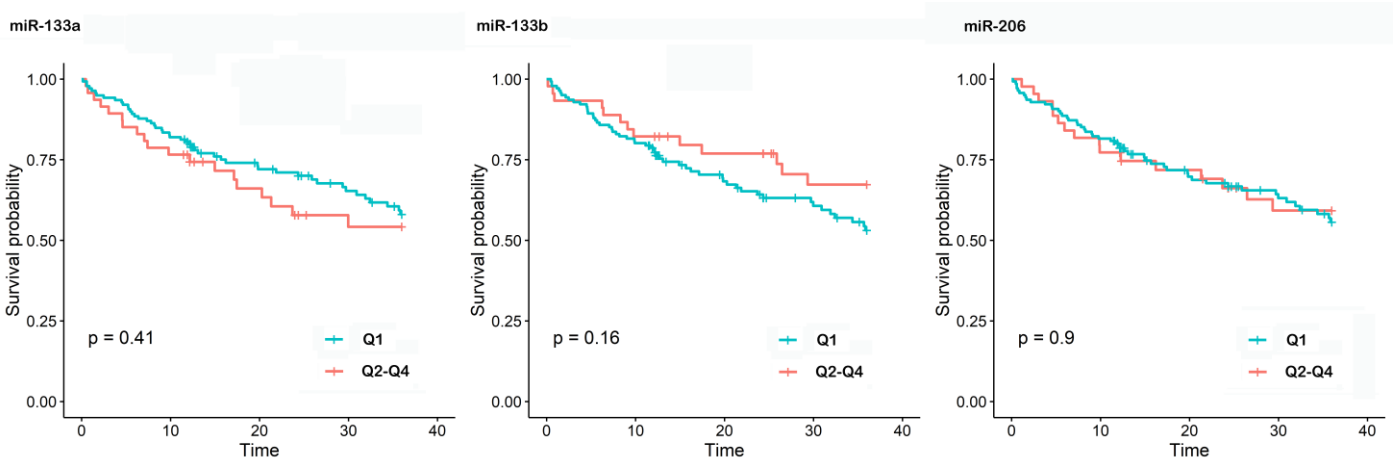

Figure S2. Kaplan-Meier survival curves of the three miRNAs in CVD patients. The p-value refers to the comparison between the highest quartile (Q1) versus the others (Q2–Q4), as assessed using the log-rank test.
