

Sup. Fig. 2 Curves of transfer efficiency and time of intrabody VH-HT3

(A) The plasmids pcDNA3.1(-)-VH-HT3 or pcDNA3.1(-) was transfected in MCF-7 cells. Flow cytometry quantification of transfection efficiency. Cells were harvested 24 h, 48 h, 72 h and 96 h post-transfection and analyzed for HA positivity with the monoclonal antibody against HA and FITC-conjugated secondary antibodies.

(B) The plasmids pcDNA3.1(-)-VH-HT3 or pcDNA3.1(-) was transfected in A549 cells. Flow cytometry quantification of transfection efficiency. Cells were harvested 24 h, 48 h, 72 h and 96 h post-transfection and analyzed for HA positivity with the monoclonal antibody against HA and FITC-conjugated secondary antibodies.
