

Supplementary Figure S1. Plants of *Nepeta nuda* cultured *in vitro*. Presented are: (A) plant grown on basal medium (BM, half-strength Murashige and Skoog medium) - control; (B) plant grown on BM supplemented with 2 μM salicylic acid (SA) for 7 days and subsequently transferred to BM without SA for three weeks; (C) plant continuously grown for 28 days on BM with 20 μM SA; (D) plant continuously grown for 28 days on BM with 50 μM SA. Plants were placed on a graph paper, where a black line represents 1 cm.
