

1. Supplementary File S1: Culture Conditions.
2. Supplementary File S2: Ultrastructural Observation Methods.
3. Supplementary File S3: Transcriptomic Analysis.
4. Supplementary File S4: Metabolomic Analysis.
5. Supplementary Table S1: List of significantly up-regulated genes.
6. Supplementary Table S2: List of significantly down-regulated genes.
7. Supplementary Table S3: qRT-PCR target-gene information and primer sequences.
8. Supplementary Table S4: Metabolite-abbreviation cross-reference table.
9. Figure S1: Transcriptome biological replicate correlation heatmap.
10. Figure S2: KEGG pathway enrichment of down-regulated genes.
11. Figure S3: KEGG pathway enrichment of up-regulated genes.
12. FigureS4: Widely targeted metabolomics biological replicate correlation heatmap.
13. Figure S5: Classification of up-regulated metabolites.
14. Figure S6: Classification of down-regulated metabolites.
15. Figure S7: KEGG pathway enrichment of up-regulated metabolites.
16. Figure S8: KEGG pathway enrichment of down-regulated metabolites.
17. FigureS9: Quality control assessments for targeted sugar and organic acid metabolomic datasets.
18. Figure S10: Phylogenetic placement of *Chlorella* sp. TLD 6B inferred from 18S rRNA gene sequences. The 18S rRNA sequence of strain TLD 6B is provided as Supplementary File S5.
