

(**a**)

(**b**)

Figure S1. Biallelic deletion of 9p21.3 nested within a region of copy-neutral loss of heterozygosity. Detailed karyoview of chromosome 9 in the three patients in whom the cnLOH segment contained a focal biallelic deletion at 9p21.3: one MRD-positive patient (a) and two MRD-negative patients (b). *Red bars indicate losses; purple bars indicate cnLOH.*
