

(**a**)

(**b**)

Figure S2. Biallelic deletion of 9p21.3 outside regions of copy-neutral loss of heterozygosity. Detailed view of chromosome 9 in the six patients with biallelic 9p21.3 deletion on a background of retained heterozygosity: one MRD-positive patient (a) and five MRD-negative patients (b). *Red bars indicate losses, deep red bars indicate biallelic losses.*
