Abbreviations: carnitine palmitoyltransferase II, CPT II; no data, ND; homozygous for p.F352C C/C; heterozygous for p.F352C, F/C; homozygous for p.F352, F/F; homozygous for p.V368I, I/I; heterozygous for p.V368I, V/I; homozygous for p.V368, V/V.

Partial data for S-01, N-02, N-03, N-04, N-05, N-06, N-07, N-10, N-12, N-21, N-26, N-36, N-37, N-43, N-47, N-50, N-52, N-54, N-55, N-56, N-61, N-63, and N-66 were presented in a previous report [4].

Partial data for S-01, N-02, N-03, N-04, N-05, N-06, N-10, N-12, N-20, N-21, N-37, S-02, S-03, and S-04 were presented in a previous report [6].

¹ Mean reference value of CPT II activity in 85 normal controls is 126.7 ± 43.2 pmol/min/ 10^5 lymphocytes.

² CPT II activity is calculated from $d_{27}\text{C}14/d_{31}\text{C}16$ in fatty acid oxidation assay: mean reference value in 36 normal controls is 0.273 ± 0.096 .

³ S-01 was a patient with symptoms who had passed our pilot NBS with C16 and C18:1; his data one reason to adopt $(\text{C}16 + \text{C}18:1)/\text{C}2$.
