

Figure S2. Comparison of element contents of stored food obtained from honey-fed and sucrose-fed colonies (mg/kg, fresh weight). Honey, stored food obtained from honey-fed colonies; SSSF, stored food obtained from sealed combs of sucrose-fed colonies; and SUSF, stored food obtained from unsealed combs of sucrose-fed colonies. Values are means \pm SD. Different lowercase letters indicate significant differences among treatments at the 0.05 level, according to the Tukey's HSD test.
