

# **Biological Control and Habitat Management for the Control of Onion Thrips, *Thrips tabaci* Lindeman (Thysanoptera: Thripidae), in Onion Production in Quebec, Canada**

## **Supplemental information**

Supplemental Table S1. Date of sowing or transplanting of the different dry onion cultivars on the three experimental sites.

	AAFC site	Site 1	Site 2
2021	Trailblazer <sup>1</sup> , Sown on May 4	Patterson <sup>2</sup> , Planted on May 26	Cartier <sup>3</sup> , Sown on May 12
2022	Trailblazer, Sown on May 3	Patterson, Planted on May 31	-

<sup>1</sup> Yellow onion, maturity = 94 days, high resistance to *Botrytis* spp., intermediate resistance to pink root.

<sup>2</sup> Yellow onion, maturity = 105 days, intermediate resistance to pink root.

<sup>3</sup> Yellow onion, maturity = 94 days, intermediate resistance to pink root.

Supplemental Table S2. Description of herbicide and fungicide treatments and date of application on the three experimental sites, in 2021 and 2022.

Site	2021		2022	
	Treatments	Dates	Treatments	Dates
AAFC site	Frontier (herbicide)	7 May	Frontier (herbicide)	5 May
