

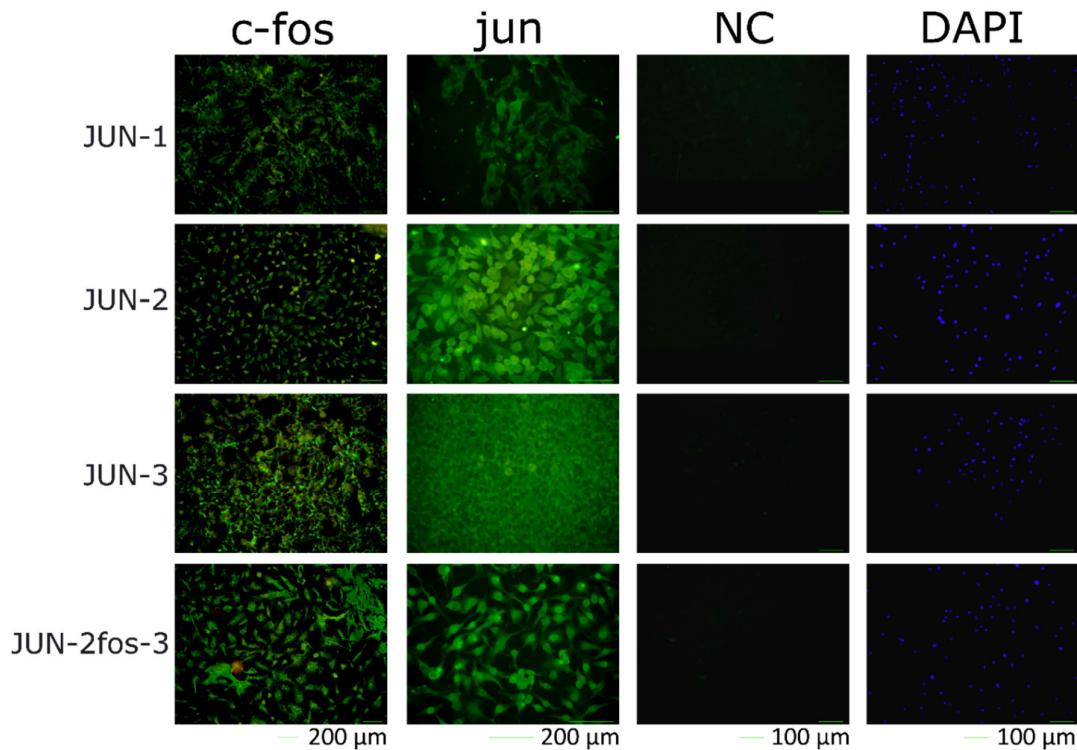

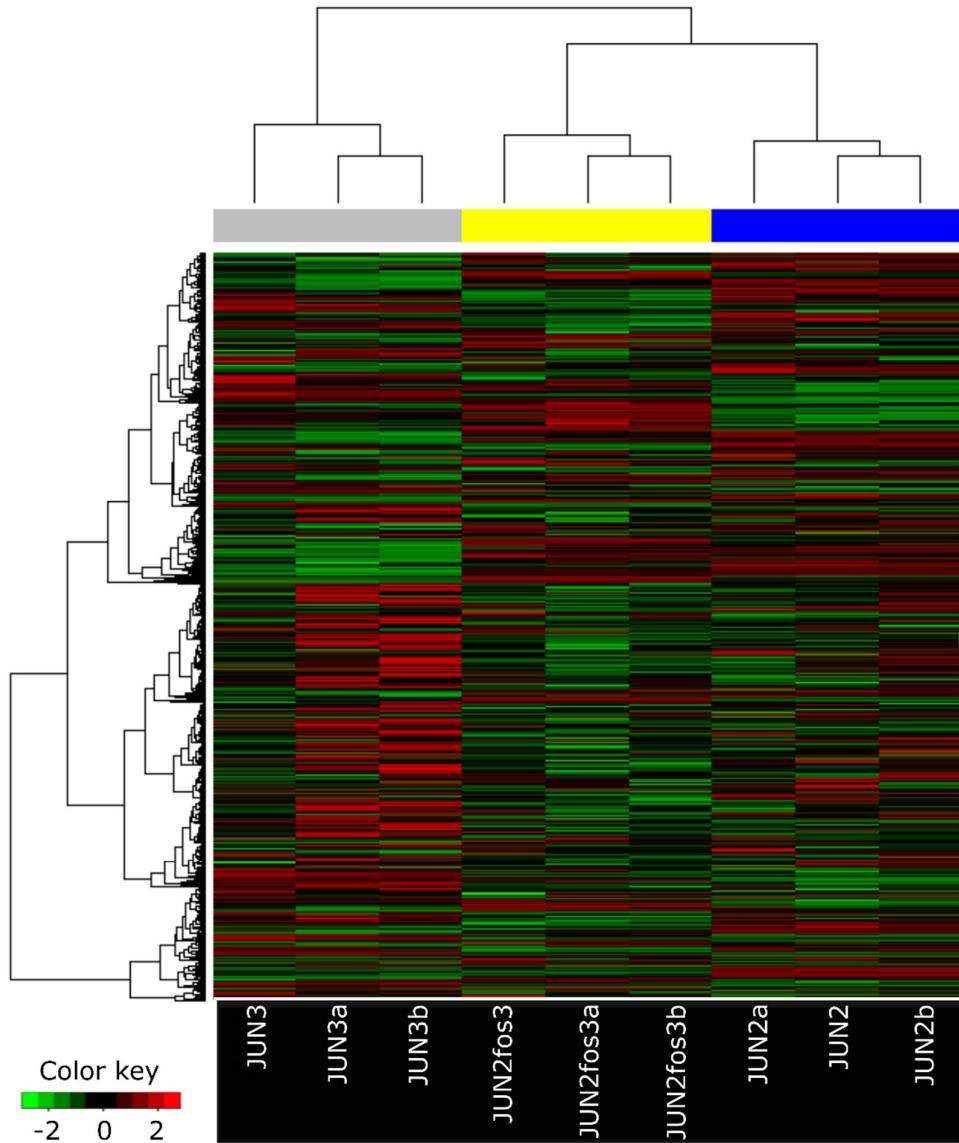

**Figure S1** Northern analysis of *c-fos* for JUN-2fos-x cell line clones

Northern analysis of *c-fos* gene expression after transfection of the CMV-*c-fos* expression vector. A single clone expressing the highest level of the *c-fos* transcript (clone 3) was designated JUN-2fos-3 and used for all other analyses.

**Figure S2** Indirect immunofluorescence analysis - Fos and Jun oncproteins expression and negative control (NC) staining, which has been carried out by omitting the respective primary antibody and the same field has been stained with DAPI staining. Pictures were taken by Olympus IX70 fluorescent microscope equipped with the Olympus DP71 camera system.

**Figure S3** Cluster dendrogram of biological replicates of sarcoma cell lines used for the transcriptomic analysis. Clustering has been carried out based on the full data matrix of expression data consisting of 22690 genes, whereas the heatmap relies on expression data of randomly selected 2000 genes.

**Table S1. Table of contrasts from comparisons of *jun* (a) and *c-fos* (b) expressions in different JUN sarcoma cell lines.** Beta= effect size – the difference between cell lines with respect to the log2-transformed relative expression of *jun* (a) or *fos* (b). CI\_L and CI\_U= limits of 95% confidence intervals for the beta, based on Bias-Corrected and Accelerated (BCa) bootstrap simulations. p= raw p-value from permutational t-test. fdr\_p= p-value corrected by False Discovery Rate correction for multiple comparisons.

**Table S8. Table of contrasts (post-hoc tests) from comparison of invasiveness of JUN-3 sarcoma cells treated with Bindarit (Bind), Maraviroc (Marav) or their combination (Comb) compared to untreated control.** Beta=effect size – the difference between cell lines with respect to given evaluated measure. CI\_L and CI\_U= limits of 95% confidence intervals for the beta, based on Bias-Corrected and Accelerated (BCa) bootstrap simulations. p= raw p-value from permutational t-test. fdr\_p= p-value corrected by False Discovery Rate correction for multiple comparison. See methods for definition of the measures states and capacities.
