Table S1. The neurosurgical procedures and its frequency in the pre-pandemic and pandemic periods.

Neurosurgical procedures (no.)	Pre-pandemic period corresponding to P1	P1	Pre-pandemic period corresponding to P2	P2
Removal of epidural hematoma	1	1	0	0
Removal of subdural hematoma	8	0	5	3
ICP monitoring	0	1	4	2
External ventricular drainage	0	1	0	0
Removal of epidural hematoma and ICP monitoring	5	4	1	0
Removal of subdural hematoma and ICP monitoring	9	6	6	10
Removal of intracerebral hematoma and ICP monitoring	4	3	1	1
External ventricular drainage and ICP monitoring	1	0	0	1
Removal of epidural hematoma, subdural hematoma and ICP monitoring	0	2	0	0
Removal of epidural hematoma, intracerebral hematoma, and ICP monitoring	0	0	0	1
Removal of subdural hematoma, intracerebral hematoma, and ICP monitoring	1	3	1	1
Removal of epidural hematoma, craniectomy, and ICP monitoring	1	0	0	0
Removal of subdural hematoma, craniectomy, and ICP monitoring	1	0	1	0
Removal of intracerebral hematoma, craniectomy, and ICP monitoring	1	1	0	0

Removal of subdural hematoma, external ventricular drainage, and ICP monitoring	3	1	0	1
Removal of intracerebral hematoma, external ventricular drainage, and ICP monitoring	0	0	3	0
Removal of subdural hematoma, intracerebral hematoma, external ventricular drainage, and ICP monitoring	0	0	0	1

ICP, Intracranial Pressure. P1, January to April 30, 2019; P2, May 11 to July 31, 2021. Pre-pandemic period refers to the same span from 2019.
