**Supplementary material**

| | Participants (n=68) | Lockdown (n=77) | |
|---|---|---|---|
| | n% | n% | p |
| **Gender:** Women | 13 (19.1) | 14 (18.1) | 0.885 |
| **Age ($\bar{x}$±SD) years** | 50.99±11.67 | 50.1±11.7 | 0.647 |
| **Civil status** | | | |
| Single | 28 (41.1) | 34 (48) | 0.783 |
| Married/partner | 16 (23.5) | 20 (25.9) | |
| Others | 24 (35.2) | 23 (29.8) | |
| **Origin** | | | |
| National | 48 (70.6) | 20 (25.9) | 0.128 |
| **Employment situation** | | | |
| Employed | 8 (11.7) | 11 (14.2) | 0.778 |
| Unemployed | 33 (48.5) | 32 (41.5) | |
| Retired | 15 (22.1) | 15 (19.4) | |
| Others | 12 (17.6) | 19 (24.6) | |
| **Living with** | | | |
| Alone | 13 (19.7) | 14 (18.2) | **0.049** |
| Family | 30 (45.5) | 24 (31.2) | |
| Homeless | 16 (24.2) | 14 (27.3) | |
| Others | 9 (13.2) | 25 (32.4) | |
| **Criminal records** | | | |
| No | 43 (63.2) | 47 (61) | 0.786 |

**Table S1.** Sociodemographic characteristics of participant patients vs lockdown period patients.

SD: standard deviation; Bold numbers represent statistically significant results.

**Table S2.** Clinical characteristics of participant patients vs lockdown period patients.

| | Participants (n=68) | Lockdown (n=77) | |
|---|---|---|---|
| | n(%) | n(%) | p |
| **Main drug:** | | | |
| Opiates | 26 (38.2) | 23 (29.8) | 0.266 |
| Alcohol | 32 (47.1) | 40 (51.9) | |
| Cocaine | 7 (10.3) | 4 (5.2) | |
| Amphetamines | 2 (3) | 1 (1.3) | |
| Tobacco | 1 (1.5) | 8 (10.3) | |
| Benzodiazepines | 0 | 1 (1.3) | |
| **Starting age main drug ($\bar{x}$±SD) years** | 18.71±6.59 | 19.17±9.5 | 0.747 |
| **Total abstinence main drug ($\bar{x}$±SD) months** | 24.15±35.27 | 19.86±46 | 0.555 |
| **Previously linked to addiction treatment** | 40 (58.9) | 45 (58.4) | 0.695 |
| **Age at first addiction treatment ($\bar{x}$±SD) years** | 34.74±14.29 | 36.03±11.8 | 0.693 |
| **Time since last consumption of the main drug ($\bar{x}$±SD) months** | 4.37±15.54 | 5.86±29.2 | 0.704 |
| **Ab. HIV serology positive** | 13 (19.1) | 14 (18.8) | 0.818 |

| | | | |
|---|---|---|---|
| **Ab. HCV serology positive** | 20 (29.4) | 24 (31.1) | 0.109 |
| **Ab. core HBV serology positive** | 14 (20.6) | 14 (18.8) | 0.065 |
| **Ag. surface HBV positive** | 2 (2.9) | 3 (3.9) | 0.091 |
| **Chronic liver disease** | 24 (35.3) | 29 (37.6) | 0.175 |

SD: Standard deviation, SUD: substance use disorder, HIV: human immunodeficiency virus, HBV: hepatitis B virus, HCV: hepatitis C virus, Ag. Antigen, Ab. Antibody.
