ECMO Predictors of Mortality: A 10-Year Referral Centre Experience

Benedikt Treml, Robert Breitkopf, Zoran Bukumirić, Mirjam Bachler, Johannes Boesch and Sasa Rajsic ^{*}

Supplementary material

Supplementary Figure S1. Comparison of patients based on the ICU admission reason and all-cause three-month mortality ($n = 358$).

Supplementary Figure S2. Kaplan-Meier estimate of all-cause three-month mortality ($n = 358$, Mean 59.5, 95% CI 55.5–63.5).

Supplementary Table S1. Laboratory parameters within 24h prior to ECMO initiation ($n = 358$)

Supplementary Table S2. Subgroup analysis: ECMO initiation on working day or weekend; baseline demographic and clinical characteristics ($n = 358$)

Supplementary Table S3. Selected demographic and clinical characteristics of patients according to the ECMO indication ($n = 358$)

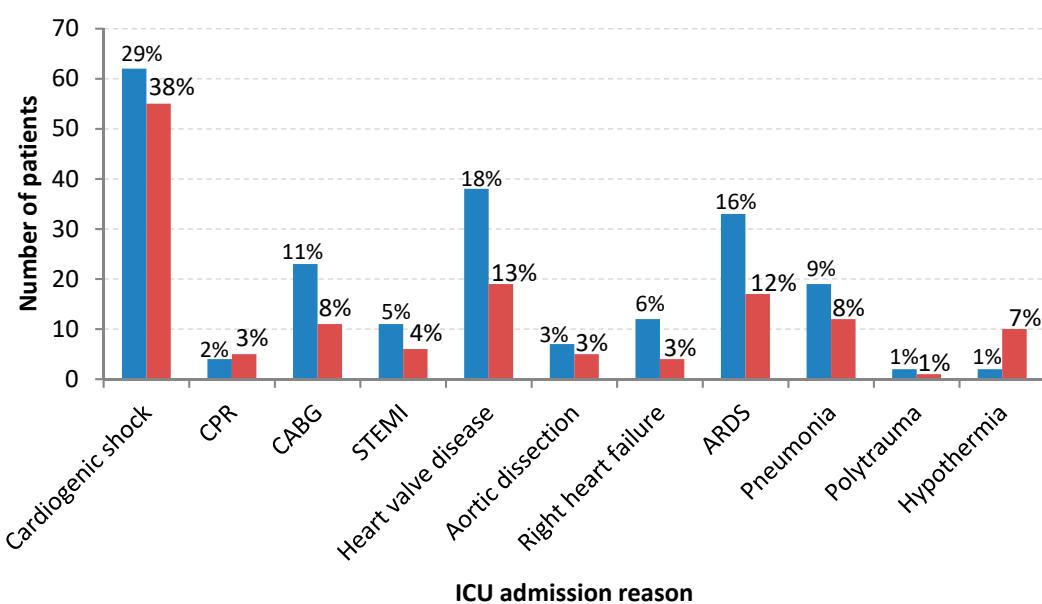

Supplementary Table S4. Veno-arterial ECMO configuration: baseline demographic and clinical characteristics ($n = 283$, all-cause three-month mortality)

Supplementary Table S5. Veno-venous ECMO configuration: baseline demographic and clinical characteristics ($n = 75$, all-cause three-month mortality)

Supplementary Table S6. Risk factors for mortality within three months from ECMO initiation: univariate cox regression analyses ($n = 358$)

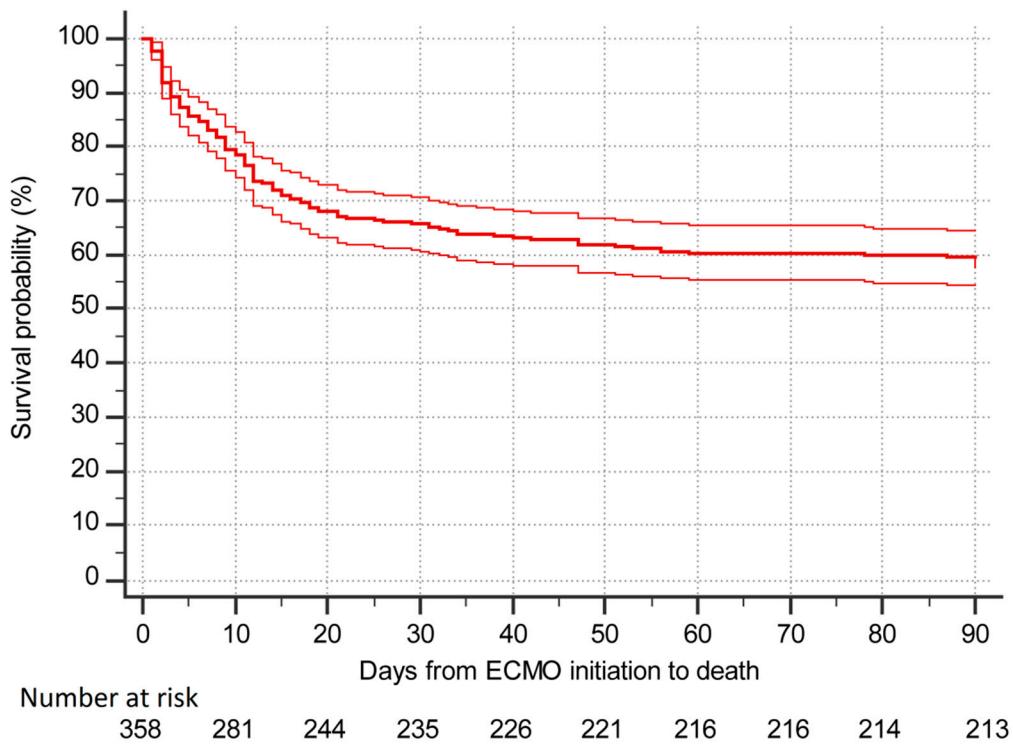

Supplementary Figure S1. Comparison of patients based on the ICU admission reason and all-cause three-month mortality ($n = 358$). Blue colour: survivors, $n = 213$; red colour: non-survivors, $n = 145$.

Abbreviations: ICU, intensive care unit; CPR, cardiopulmonary resuscitation; CABG, Coronary artery bypass graft; STEMI, ST-elevation myocardial infarction; ARDS, Acute respiratory distress syndrome.

Supplementary Figure S2. Kaplan-Meier estimate of all-cause three-month mortality ($n = 358$, mean 59.5, 95% CI 55.5-63.5).

Variables with increased hazard ratio for mortality: ECMO initiation on weekend, admission due to hypothermia, reanimation before ECMO initiation, SAPS III and SOFA score, hypothermia as indication for ECMO support, haemorrhage, sepsis and ICU length of stay. Abbreviations: CI, confidence Intervals; HR, hazard ratio; SAPS III, simplified acute physiology score III; SOFA, sequential organ failure assessment score; ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation.
