

Supplementary Materials

Figure S1 Heatmap of unique human proteins carried in *Pf*-MV. Side bar indicates differential protein expression between each sample (blue: decrease, red: increase). Rows: proteins; columns: samples.

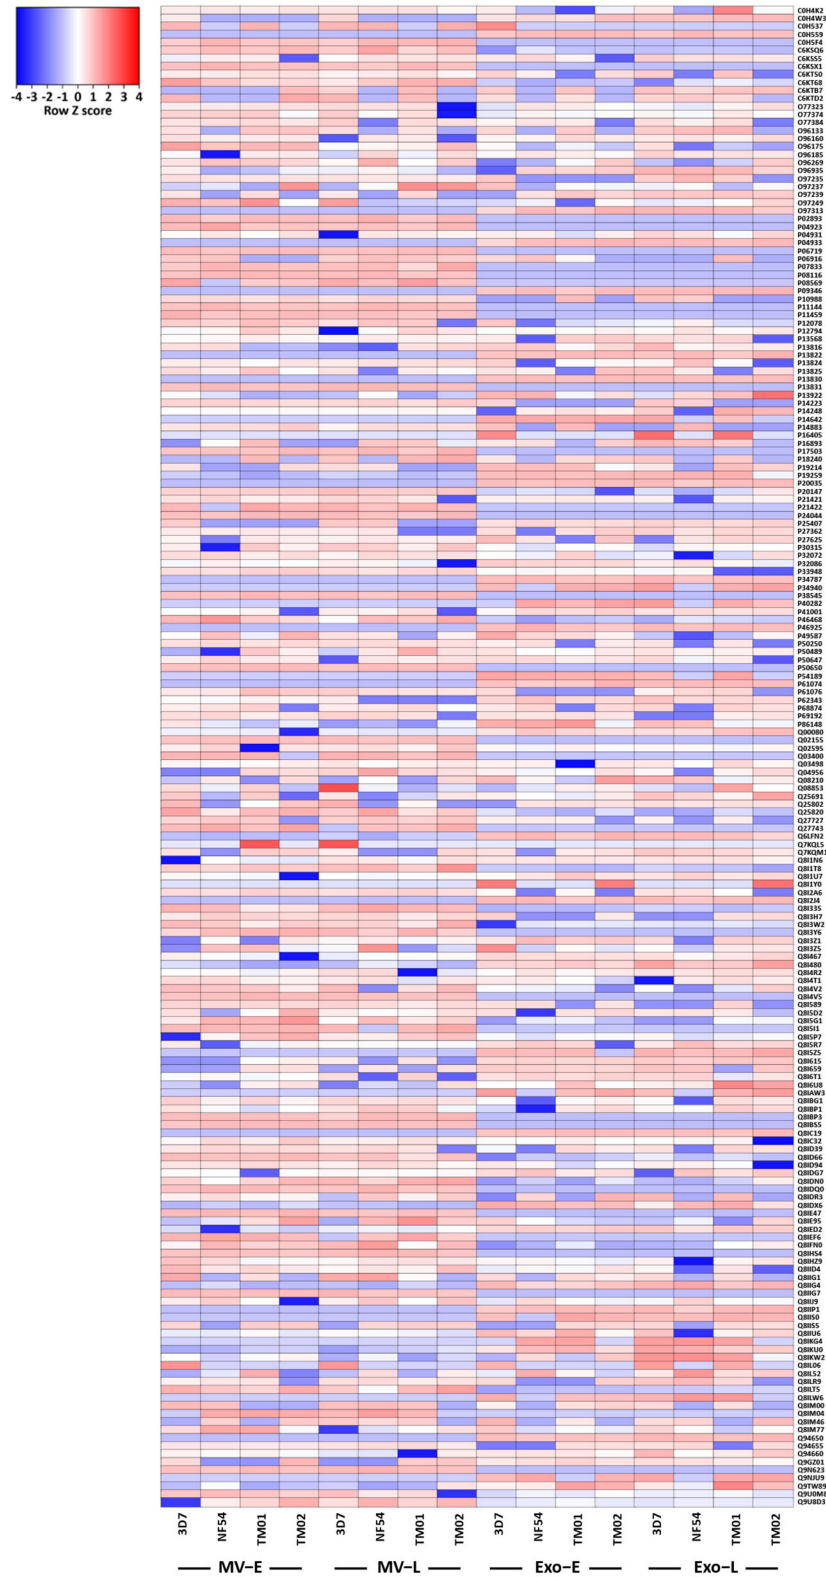

Figure S3 Heatmap analysis of differential expression levels of *P. falciparum* proteins in each type of *Pf*-EVs from 4 *P. falciparum* strains. Side bar indicates differential protein expression between each sample (blue: decrease, red: increase). Rows: proteins; columns: samples.
