## Supplementary Materials and Methods

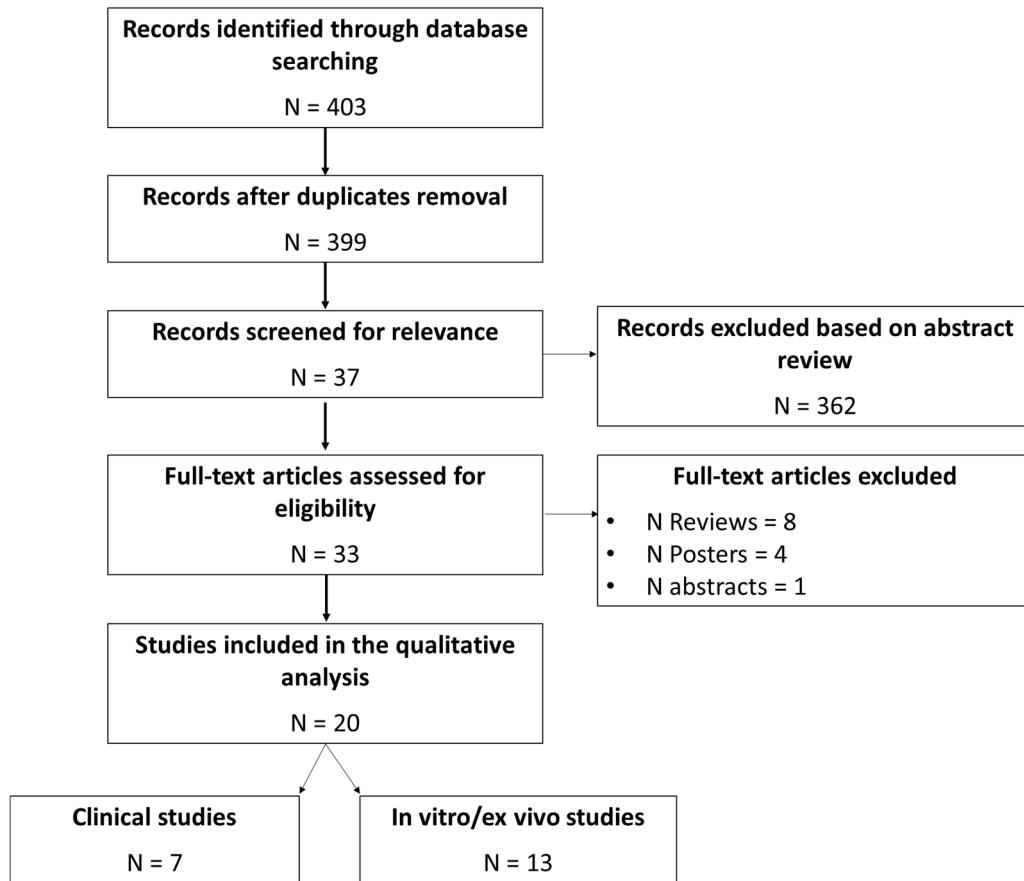

### Literature Review

A bibliographic search was carried out on the MEDLINE, Embase and Scopus databases from 2012 to 2022. A search string containing the following terms and limits was generated: (((("Salvage Therapy"[MeSH] OR "Operative Blood Salvage"[Mesh] OR cell salvage[Title/Abstract] OR blood salvage[Title/Abstract])) AND ((("Neoplasms"[Mesh] OR cancer[Title/Abstract] OR tumor[Title/Abstract] OR neoplasm[Title/Abstract] OR oncol\*[Title/Abstract]))) AND ((filtration[title/abstract] OR leukocyte depletion[title/abstract] OR LDF[title/abstract]))) OR (((("Salvage Therapy"[MeSH] OR "Operative Blood Salvage"[Mesh] OR cell salvage[Title/Abstract] OR blood salvage[Title/Abstract]) AND ((("Neoplasms"[Mesh] OR cancer[Title/Abstract] OR tumor[Title/Abstract] OR neoplasm[Title/Abstract] OR oncol\*[Title/Abstract]))) AND (irradiation[title/abstract])). A consultation of the Italian regulations, SIMTI national guidelines and the European Directorate for the Quality of Medicines & HealthCare (EDQM) was also carried out.

### Results of the literature review

The bibliographic search was focused on the scientific literature published in the last 10 years (since 2013) and concerning cell salvage studies in cancer that included a filtration and/or irradiation step. In our search we excluded all the literature that did not assess at least one of these steps. The string reported the presence of 403 articles pertaining to our research question, with 333 articles from PubMed, 59 from Embase, 62 from Cochrane and 46 from Scopus (see PRISMA flow diagram in

Figure SI of the Supplementary Information). Eight reviews were identified and discussed separately. After duplicates removal, sorting for relevance and abstracts/posters exclusion, the full-text articles published in the last 10 years and included in our review were only 20: of these, 7 were clinical (mainly retrospective) and 13 were in vitro/ex vivo studies.

**Figure S1. PRISMA flow diagram of the literature revision.** Records were identified according to the string detailed in Materials and Methods section.

## SUPPLEMENTARY TABLES

**Table S1. Clinical and in vitro/ex vivo studies on cell salvage plus filtration and/or irradiation in cancer surgery published since 2013:**

Author	Year	Journal	DOI	Study type	Diagnosis	N subjects	Control group	Treatment	N control	N treated
Gakhar H. et al. [1]	2013	Asian Spine Journal	10.4184/asj.2013.7.3.167 10.1111/tri.12001	clinical	metastatic spine tumor	10	none	CS+LD	none	10
