Table S1:

Patients with systemic hypertension at one year following surgery			
	Ischemic Onset	**Hemorrhagic Onset**	**p**
Yes (n = 32)	28	4	***0.010***
No (n = 36)	31	5	***0.003***

Results are given for all patients including both uni- and bilateral disease. For patients with bilateral disease results are drawn from status after revascularization of the second hemisphere. Group comparisons were performed using the McNemar test with $p<0.05$ considered statistically significant.

Table S2:

Patients with systemic hypertension at one year following surgery			
	Ischemic Onset	**Hemorrhagic Onset**	**p**
Yes (n=32)	28	4	***0.010***
No (n=36)	31	5	***0.003***

Results are given for all patients including both uni- and bilateral disease. For patients with bilateral disease results are drawn from status after revascularization of the second hemisphere. Group comparison were performed using the McNemar test with $p<0.05$ considered statistically significant.
