

# Platelet Reduction after Transcatheter Aortic Valve Implantation: Results from the PORTRAIT Study

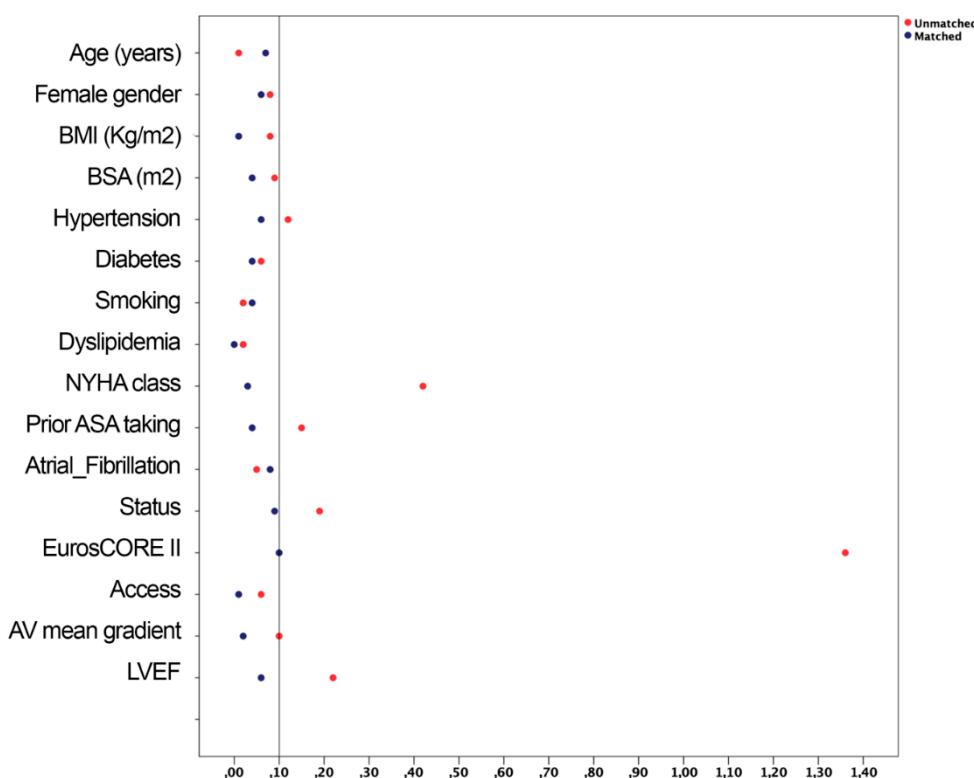

## Supplemental Material

### Definition of patient characteristics

- **Hypertension:** according the 2020 guidelines by the International society of Hypertension. (Unger T, Borghi C, Charchar F, Khan NA, Poulter NR, Prabhakaran D, Ramirez A, Schlaich M, Stergiou GS, Tomaszewski M, Wainford RD, Williams B, Schutte AE. 2020 International Society of Hypertension Global Hypertension Practice Guidelines. *Hypertension*. 2020 Jun;75(6):1334-1357. doi: 10.1161/HYPERTENSIONAHA.120.15026.)
- **Diabetes Mellitus type II:** according the guidelines by the European Association for the study of Diabetes (Management of hyperglycaemia in type 2 diabetes, 2022. A consensus report by the American Diabetes Association (ADA) and the European Association for the Study of Diabetes (EASD) (2022) - <https://www.easd.org/guidelines/statements-and-guidelines.html>)
- **Smoking:** Tobacco smoking is the practice of burning tobacco with the smoke inhaled to be tasted and absorbed into the bloodstream. (Adams TN, Morris J. Smoking. [Updated 2023 May 22]. In: StatPearls [Internet]. Treasure Island (FL): StatPearls Publishing; 2024 Jan-. Available from: <https://www.ncbi.nlm.nih.gov/books/NBK537066/>)
- **Dyslipidemia:** it is the imbalance of lipids such as cholesterol, low-density lipoprotein cholesterol, (LDL-C), triglycerides, and high-density lipoprotein (HDL). (Pappan N, Rehman A. Dyslipidemia. [Updated 2023 Jul 10]. In: StatPearls [Internet]. Treasure Island (FL): StatPearls Publishing; 2024 Jan-. Available from: <https://www.ncbi.nlm.nih.gov/books/NBK560891/>)
- **NYHA class:** The NYHA classification is commonly used as a method for functional classification in patients with heart failure. (Raphael C, Briscoe C, Davies J, Ian Whinnett Z, Manisty C, Sutton R, Mayet J, Francis DP. Limitations of the New York Heart Association functional classification system and self-reported walking distances in chronic heart failure. *Heart*. 2007 Apr;93(4):476-82. doi: 10.1136/heart.2006.089656.)
- **COPD:** a heterogeneous lung condition characterized by chronic respiratory symptoms (dyspnea, cough, expectoration, exacerbations) due to abnormalities of the airways (bronchitis, bronchiolitis) and/or alveoli (emphysema) that cause persistent, often progressive, airflow obstruction. (GLOBAL STRATEGY FOR PREVENTION, DIAGNOSIS AND MANAGEMENT OF COPD: 2023 Report <https://goldcopd.org/2023-gold-report-2/>)
- **Atrial Fibrillation:** A supraventricular tachyarrhythmia with uncoordinated atrial electrical activation and consequently ineffective atrial contraction. Electrocardiographic characteristics of AF include: Irregularly irregular R-R intervals (when atrioventricular conduction is not impaired); Absence of distinct repeating P waves, and Irregular atrial activations. (Gerhard Hindricks, et al, ESC Scientific Document Group , 2020 ESC Guidelines for the diagnosis and management of atrial fibrillation developed in collaboration with the European Association for Cardio-Thoracic Surgery (EACTS): The Task Force for the diagnosis and management of atrial fibrillation of the European Society of Cardiology (ESC) Developed with the special contribution of the European Heart Rhythm Association (EHRA) of the ESC, European Heart Journal, Volume 42, Issue 5, 1 February 2021, Pages 373-498, <https://doi.org/10.1093/eurheartj/ehaa612>)
- **Ischemic stroke:** defined by the AHA/ASA guidelines (Kleindorfer DO, et al. 2021 Guideline for the Prevention of Stroke in Patients With Stroke and Transient Ischemic Attack: A Guideline From the American Heart Association/American Stroke Association. *Stroke*. 2021 Jul;52(7):e364-e467. doi: 10.1161/STR.0000000000000375.)

- **Peripheral artery disease:** defined by the ESC and ESVS (Victor Aboyans, et al, ESC Scientific Document Group , 2017 ESC Guidelines on the Diagnosis and Treatment of Peripheral Arterial Diseases, in collaboration with the European Society for Vascular Surgery (ESVS): Document covering atherosclerotic disease of extracranial carotid and vertebral, mesenteric, renal, upper and lower extremity arteries Endorsed by: the European Stroke Organization (ESO); The Task Force for the Diagnosis and Treatment of Peripheral Arterial Diseases of the European Society of Cardiology (ESC) and of the European Society for Vascular Surgery (ESVS), European Heart Journal, Volume 39, Issue 9, 01 March 2018, Pages 763–816, <https://doi.org/10.1093/eurheartj/ehx095>
- **Myocardial infarction:** Fourth universal definition of myocardial infarction (2018) (Kristian Thygesen, et al, ESC Scientific Document Group , Fourth universal definition of myocardial infarction (2018), European Heart Journal, Volume 40, Issue 3, 14 January 2019, Pages 237–269, <https://doi.org/10.1093/eurheartj/ehy462>).

**Figure S1. Variables included into the propensity model.**

**Table S1. Type of transcatheter prostheses.**

	Prosthesis	Patients

<b>Access conversion</b>	14 (1.2%)	4 (1.0%)	10 (1.4%)	-0.19

Abbreviations: SEV, self-expanding valve; BEV, balloon expandable valve; SMD, standardized mean difference; BMI, body mass index; BSA, body surface area; NYHA, New York heart association; COPD, chronic obstructive pulmonary disease; PAD, peripheral artery disease; MI, myocardial infarction; PCI, percutaneous coronary intervention; CABG, coronary artery bypass grafting; ASA, aspirin or acetylsalicylic acid; DAPT, dual antiplatelet therapy; LMWH, low molecular weight heparin; DOAC, direct oral anticoagulant; AV, aortic valve; AVA, aortic valve area; LVEF, left ventricle ejection fraction; AR, aortic regurgitation; sPAPs, systolic pulmonary artery pressure; LV, left ventricle. Age, BMI, BSA, AVA peak and mean gradient, AVA/BSA, LVEF, and sPAP are presented as mean  $\pm$  standard deviation. EuroSCORE II is presented as median and interquartile range.

**Table S3. Peri-procedural laboratory values after transcatheter aortic implantation in the unmatched population.**

TIME	Overall population (n = 1122)	SEV (n = 395)	BEV (n = 727)	p-value
Platelet count ( $\times 1000/\mu\text{L}$ )				
Baseline	212 (171-257)	210 (169-252)	212 (171-261)	0.280
Day 0	172 (141-213)	180 (150-216)	164 (132-205)	0.060
Day 1	165 (136-204)	165 (140-208)	165 (134-203)	0.739
Day 2	148 (117-184)	148 (124-183)	148 (114-185)	0.837
Day 3	144 (114-182)	146 (120-186)	142 (111-181)	0.326
