

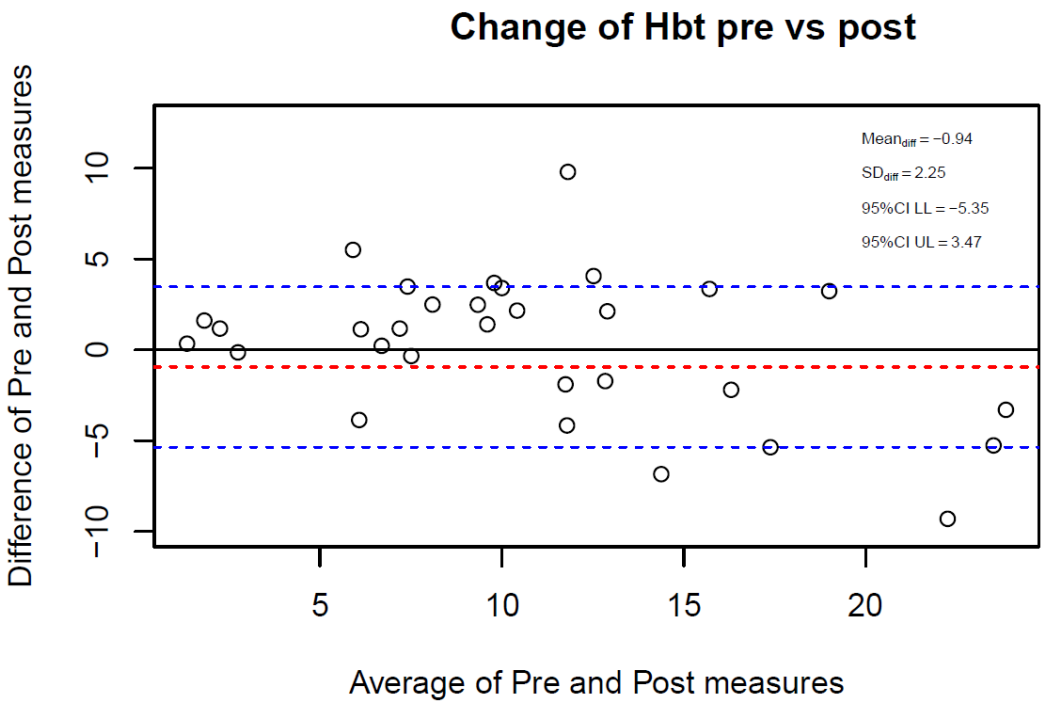

Figure S1. Bland–Altman plot for the difference between the concentrations of oxyhemoglobin and deoxyhemoglobin.

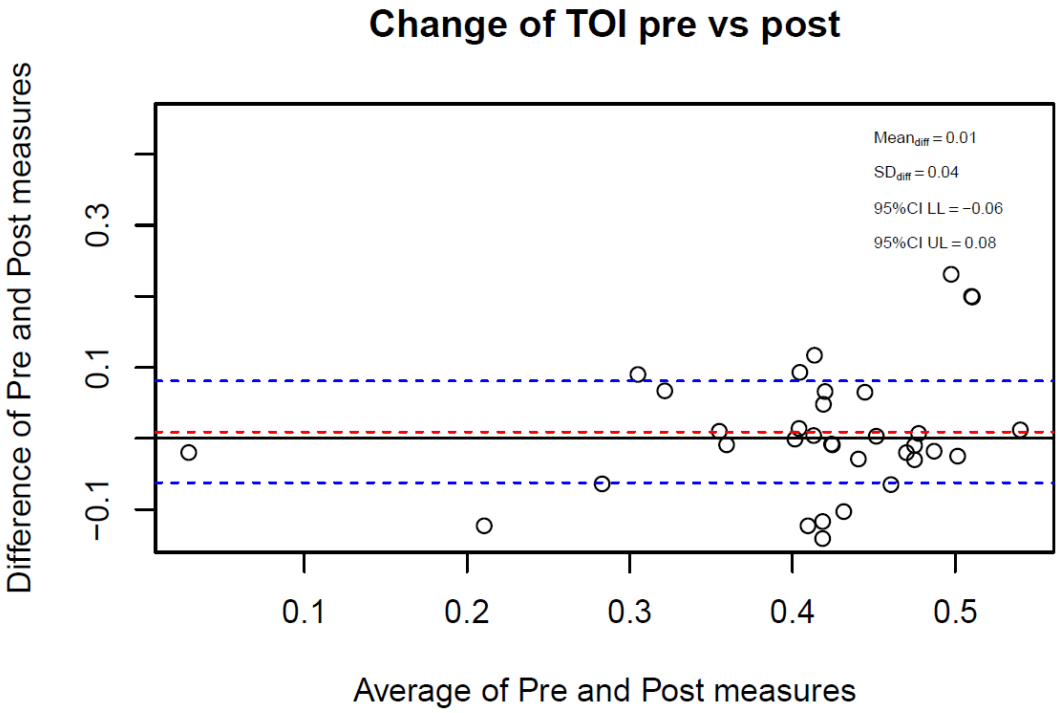

Figure S2. Bland–Altman plot for the difference between the initial and final tissue oxygenation index values.

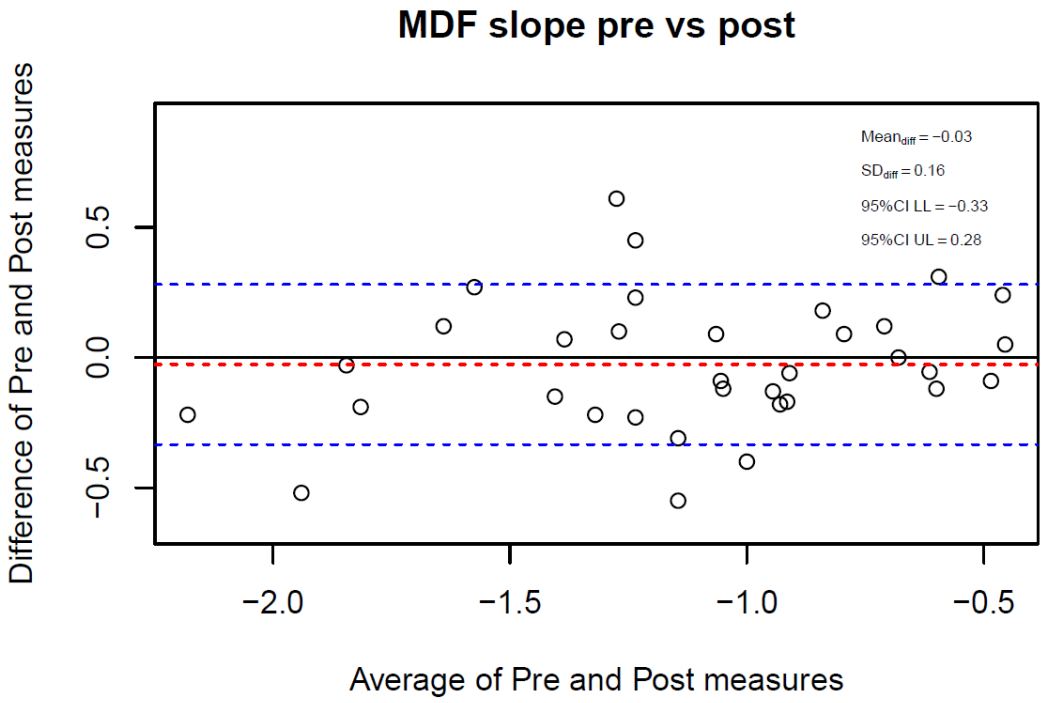

Figure S3. Bland–Altman plot for the slope of the changes in the median frequency.

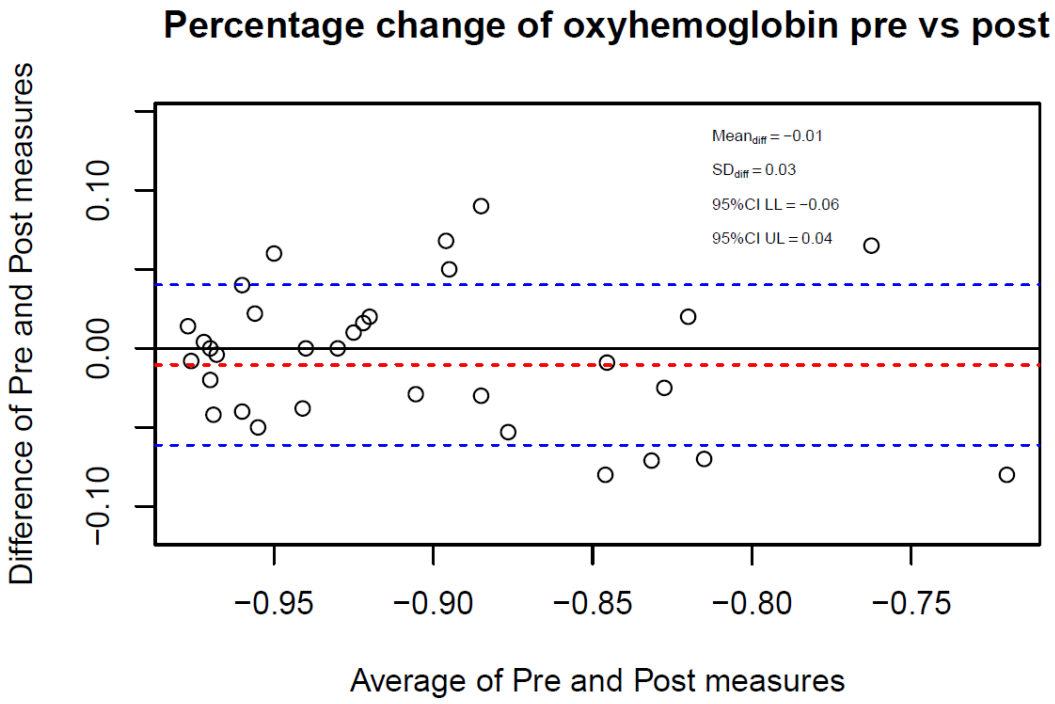

Figure S4. Bland–Altman plot for the percentage change in oxyhemoglobin concentration.

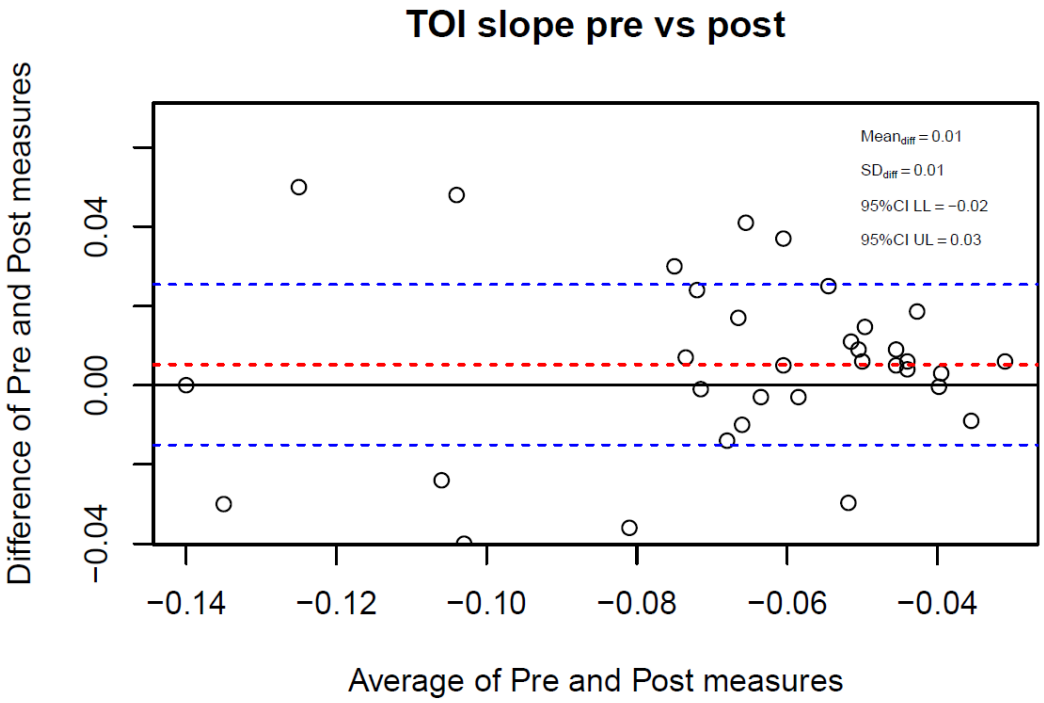

Figure S5. Bland–Altman plot for the slope of tissue oxygenation index.
