

Figure S2. Generation of *FsBmh1* deletion mutants strains. (A,B) *FsBmh1* gene locus and gene replacement construct. (C) *FsBmh1* deletion mutants were validated by PCR with *FsBmh1*-A/B. (D) *FsBmh1* deletion mutants strains were validated by Southern Blot. The probes have been marked in the Figure.

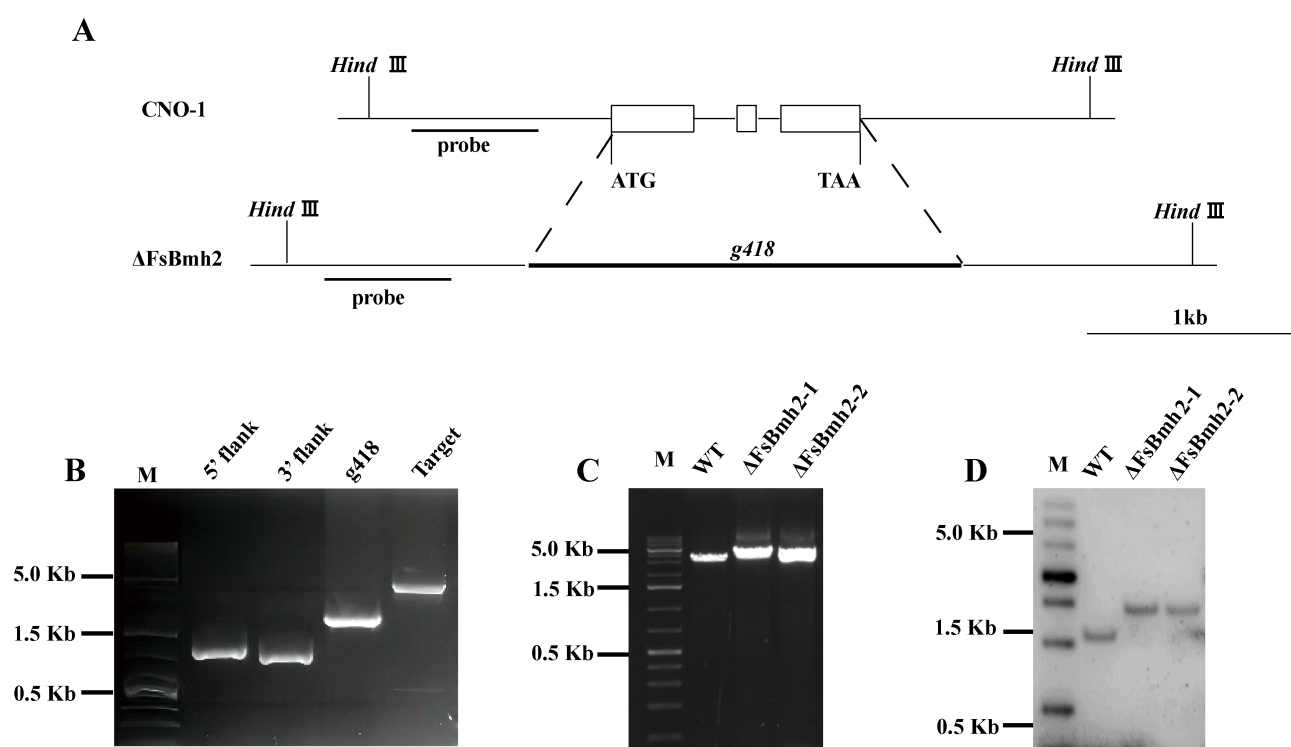

Figure S3. Generation of *FsBmh2* deletion mutants strains. (A,B) *FsBmh2* gene locus and gene replacement construct. (C) *FsBmh2* deletion mutants were validated by PCR with *FsBmh2*-A/B. (D) *FsBmh2* deletion mutants strains were validated by Southern Blot. The probes have been marked in the Figure.
