

Figure S7. Validation of DEGs in Δ FsBmh1 and Δ FsBmh2. (A) Up-regulated genes in Δ FsBmh1 and Δ FsBmh2 versus WT. (B) Down-regulated genes in Δ FsBmh1 and Δ FsBmh2 versus WT. P-value were calculated based on Student's T-test of replicate $2^{-\Delta\Delta CT}$ values between a sample and WT. * $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$.
