

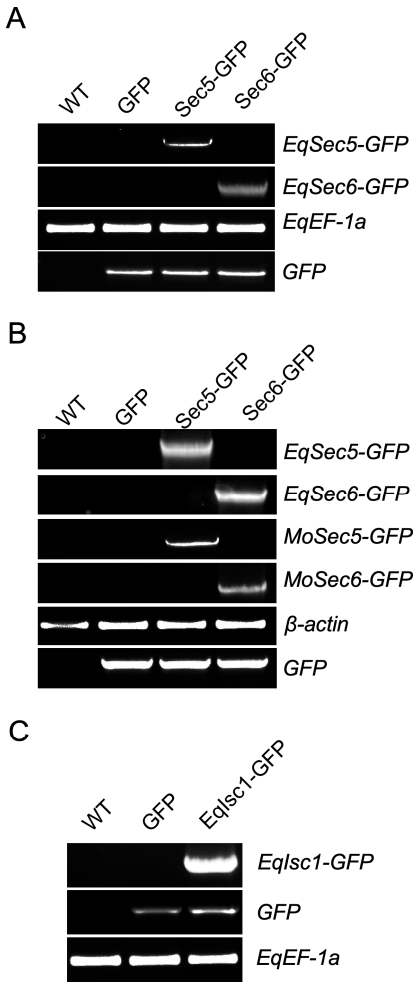

Figure S3 RT-PCR analysis of transgenes in *E. quercicola* and *M. oryzae* transformants. The expressions of GFP-fused exocyst genes in *E. quercicola* (A) and *M. oryzae* (B) were validated. *EqEF-1a* (A) and *β-actin* (B) were used as the reference controls. (C) The expression levels of GFP-fused *EqIsc1* genes in *E. quercicola* were validated. *EqEF-1a* was used as the reference control.
