

Figure S1. The growth rate of the representative isolates of *Colletotrichum* spp. obtained in this study. Data were analysed with SPSS Statistics 19.0 (WinWrap Basic; <http://www.winwrap.com>) by one-way analysis of variance, and means were compared using Duncan's test at a significance level of $P = 0.05$. Letters over the error bars indicate the significant difference at the $P = 0.05$ level.
