Figure S3. Absorbance readings taken at 750nm after 48hr of incubation of isolates in a growth medium incorporated with the 24 compounds. Red indicates susceptibility and yellow indicates the resistance of isolates to the potential antifungal compounds.

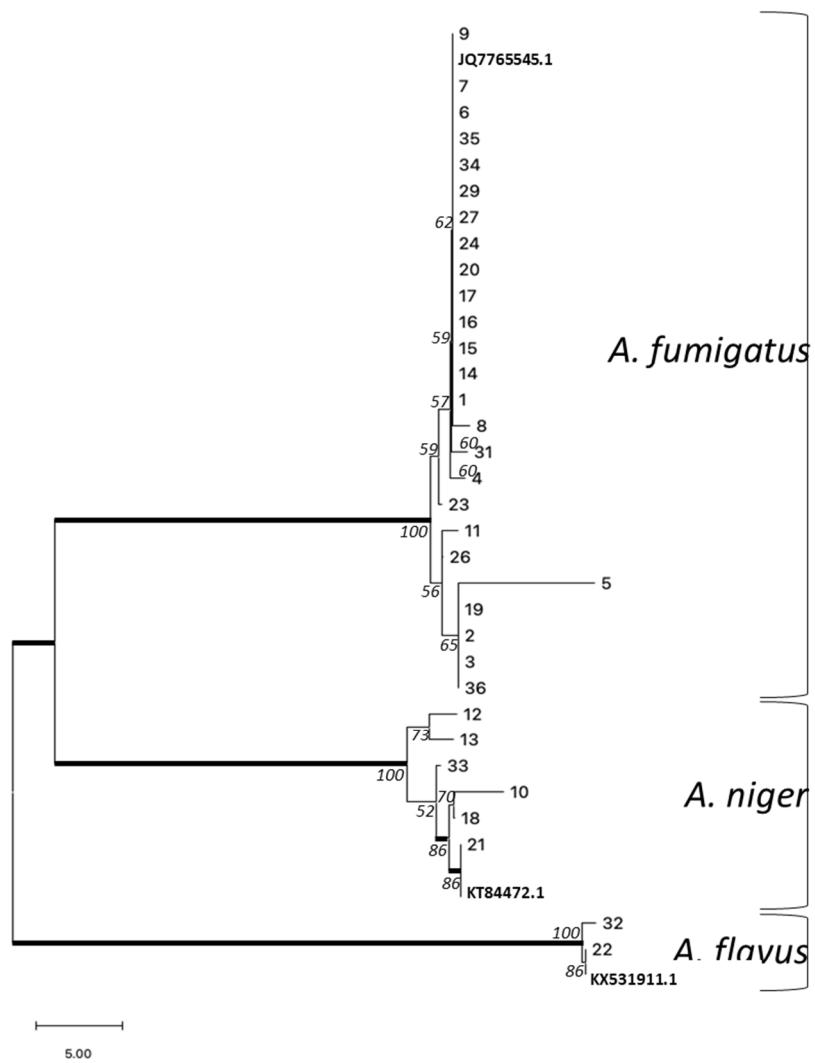

Figure S4. Phylogenetic tree showing isolates of Aspergillus species. The sequences were aligned and the tree was done using Neighbour-Joining analysis and visualised on Treebase. dark lines that the branches with more than 75% support with UPGMA to the NJ tree (1000 bootstrap).
