Supplementary Table S1: Interaction between in-hospital ACCD use and admission time on outcomes

Outcomes		*p* for interaction
	ROSC	< 0.001
	Chest injuries	< 0.001
	IHCPR duration	< 0.001
	Survival to ED discharge	< 0.001
	Survival to hospital discharge	< 0.001
	Survival with good neurological outcome to hospital discharge	< 0.001

ACCD, automatic chest compression devices; ROSC, return of spontaneous circulation; IHCPR, in-hospital cardiopulmonary resuscitation; ED, emergency department.
