January 7th, 2021

TO: Dr. Huseyin Yalcin, Biomedical Research Center, Qatar University
Email: hycin@qu.edu.qa

FROM: Qatar University - Institutional Animal Care & Use Committee (QU-IACUC)

SUBJECT: Letter of IACUC Protocol Approval (QU-IACUC 019/2020) – Designated Member Review (DMR)
Project Title: "Development and in vivo testing of smart nanoparticles for enhanced anti-cancer activity and reduced cardiotoxicity associated with Tyrosine kinase inhibitors"
Grant: QUST-2-CHS-2020-11

Dear Dr. Huseyin,

The Qatar University Institutional Animal Care and Use Committee (QU-IACUC) has **APPROVED** by the designated member review the above referenced Animal Use Protocol # **QU-IACUC 019/2020**.

Date of Initial Approval: January 7, 2021 **Date of Expiration:** January 6, 2022

The IACUC staff will make every effort to send the Principal Investigator annual reminders. However, it is the Principal Investigator's sole responsibility to submit needed renewals and Annual Review **at least one month in advance** of the annual review due dates to ensure continuing IACUC approval. **It is very important that these deadlines are not missed.** Failure to submit an Annual Review/Renewal on time will result in all persons listed under this protocol losing access to zebrafish facility and animal ordering and may potentially result in the termination of the protocol. QU-IACUC deals with expired protocols approvals as new submissions.

Please note that to continue this research/protocol beyond the **three-year period since its start**, a new protocol submission will be required. To avoid a lapse in IACUC approval, it is essential that the completed annual renewal protocol be submitted and approved by the IACUC prior to its expiration date.

Ministry of Public Health regulations do not permit the IACUC to extend any approval periods. If a renewal protocol has not been processed and approved by the IACUC prior to its expiry, IACUC approval for the work under the above referenced protocol will expire. Should IACUC approval expire, all activities involving the care and use of animals **must cease immediately**. Any activities conducted under the protocol after expiration will be in direct violation of governmental regulations and institutional/IACUC policies.

It is the responsibility of the Principal Investigator to notify the IACUC of any proposed changes regarding the work described within this protocol. The Principal Investigators listed above agree that no such changes will be implemented until approved by the IACUC, except where absolutely necessary to eliminate apparent immediate hazards to person(s) and/or animal(s).

Kindly refer to the above Animal Use Protocol number in all of your future correspondence with us pertaining to this project.

Sincerely,

Dr. Abdelali Agouni, MSc, PhD, FHEA
Chair of QU-IACUC
Qatar University
Doha, Qatar
