Table S3. Results of Wilcoxon test comparing the results of the proposed algorithms with different iteration number, according to Cluster Error.

Algorithm	Pair	Cluster Error			
		win-loses-ties	p-value	Decision	
CABC	50 it vs. 100 it	5-9-1	0.198	Do not reject H0	
	50 it vs. 500 it	6-9-0	0.865	Do not reject H0	
	50 it vs. 1000 it	6-9-0	0.609	Do not reject H0	
CFA	50 it vs. 100 it	5-7-3	0.754	Do not reject H0	
	50 it vs. 500 it	5-7-3	0.754	Do not reject H0	
	50 it vs. 1000 it	4-10-1	0.551	Do not reject H0	
CNBA	50 it vs. 100 it	7-7-1	0.594	Do not reject H0	
	50 it vs. 500 it	6-7-2	0.917	Do not reject H0	
	50 it vs. 1000 it	7-8-0	0.955	Do not reject H0	

The Friedman test comparing the different iteration number for CABC, CFA and CNBA algorithms according to Cluster Error obtained p-values of 0.923263, 0.391625 and 0.989334, respectively. Due to no differences in the performance of the algorithms were found, there is no need to apply post-hoc tests.

Table S17. Results of Wilcoxon test comparing the results of the proposed algorithms with different fitness function.

Algorithm	Pair	Cluster Error		
		win-loses-ties	p-value	Decision
CABC	Davies - Bouldin vs. Dunn's	5-9-1	0.394	Do not reject H0
	Davies - Bouldin vs. Silhouette	6-8-1	0.433	Do not reject H0
	Dunn's vs. Silhouette	8-7-0	0.925	Do not reject H0
CFA	Davies - Bouldin vs. Dunn's	8-7-0	0.363	Do not reject H0
	Davies - Bouldin vs. Silhouette	7-8-0	0.532	Do not reject H0
	Dunn's vs. Silhouette	5-10-0	0.776	Do not reject H0
CNBA	Davies - Bouldin vs. Dunn's	5-8-2	0.730	Do not reject H0
	Davies - Bouldin vs. Silhouette	5-8-2	0.507	Do not reject H0
	Dunn's vs. Silhouette	6-8-1	0.382	Do not reject H0

The Friedman test obtained p-values of 0.361799, 0.627089, and 0.165299, respectively. Due to no differences in the performance of the algorithms were found, there is no need to apply post-hoc tests.
