

Overview publications of the systematic review on rehabilitation, auditory, speech and language development of young CI-children

A-score

1. Monshizadeh L, Vameghi R, Rahimi M, Sajedi F, Adegari;F., Hashemi SB. The effectiveness of a specifically-designed language intervention protocol on the cochlear implanted children's communication development. *Int J Pediatr Otorhinolaryngol.* 2019;109631.
2. Qiao X, Ren Q, X L, Li TL, Mariano R. Analysis of subjective perception and influencing factors of different inclusive education models among prelingually deaf children with a cochlear implant. *J Int Med Res.* 2020;48(6), 1-7.

B-score

1. Abdi S, Khalessi MH, Khorsandi M, Gholami B. Introducing music as a means of habilitation for children with cochlear implants. *Int J Pediatr Otorhinolaryngol.* 2001 Jun 7;59(2):105-13.
2. Archbold SM, Nikolopoulos TP, Lloyd-Richmond H. Long-term use of cochlear implant systems in paediatric recipients and factors contributing to non-use. *Cochlear Implants Int.* 2009 Mar;10(1):25-40.
3. Bakhshaei M, Ghasemi MM, Shakeri MT, Razmara N, Tayarani H, Tale MR. Speech development in children after cochlear implantation. *Eur Arch Otorhinolaryngol.* 2007 Nov;264(11):1263-1266.
4. Bavin EL, Sarant J, Hackworth NJ, Bennetts SK, Buzhardt J, Jia F, Button E, Busby P, Leigh G, Peterson C. Modelling the early expressive communicative trajectories of infants/toddlers with early cochlear implants. *J Child Lang.* 2020 Jul;47(4):796-816.
5. Bavin EL, Sarant J, Leigh G, Prendergast L, Busby P, Peterson C. Children with cochlear implants in infancy: predictors of early vocabulary. *Int J Lang Commun Disord.* 2018 Jul;53(4):788-798.
6. Castellanos, Irina; Kronenberger, William G; Beer, Jessica; Henning, Shirley C; Colson, Bethany G; Pisoni, David B. Preschool speech intelligibility and vocabulary skills predict long-term speech and language outcomes following cochlear implantation in early childhood. *Cochlear Implants International: An Interdisciplinary Journal*, Jul2014; 15(4): 200-210.
7. Chen Y, Wong LL, Zhu S, Xi X. Early speech perception in Mandarin-speaking children at one-year post cochlear implantation. *Res Dev Disabil.* 2016 Feb- Mar;49-50:1-12
8. Chen Y, Wong LL, Zhu S, Xi X. Vocabulary development in Mandarin-speaking children with cochlear implants and its relationship with speech perception abilities. *Res Dev Disabil.* 2017 Jan;60:243-255.
9. Ching TYC, Dillon H, Leigh G, Cupples L. Learning from the Longitudinal Outcomes of Children with Hearing Impairment (LOCHI) study: summary of 5-year findings and implications. *Int J Audiol.* 2018 May;57(sup2):S105-S111.
11. Compton, M.V., Tucker, D.A., Flynn, P.F. Preparation and perceptions of speech-language pathologists working with children with cochlear implants (2009) *Communication Disorders Quarterly*, 30 (3), pp. 142-154.
12. Connor CM, Hieber S, Arts HA, Zwolan TA. Speech, vocabulary, and the education of children using cochlear implants: oral or total communication? *J Speech Lang Hear Res.* 2000 Oct;43(5):1185-1204.

13. Davidson LS, Geers AE, Blamey PJ, Tobey EA, Brenner CA. Factors contributing to speech perception scores in long-term pediatric cochlear implant users. *Ear Hear.* 2011 Feb;32(1 Suppl): 19S-26S.
14. Deocampo, Joanne A; Smith, Gretchen NL; Kronenberger, William G; Pisoni, David B; Conway, Christopher M. The Role of Statistical Learning in Understanding and Treating Spoken Language Outcomes in Deaf Children With Cochlear Implants, *Language, Speech & Hearing Services in Schools* (Online), suppl. Special Issue: How Statistical Learning Relates to Speech-Language Pathology; Washington Vol. 49, Iss. 3S, (Aug 2018): 723-739.
