

PICS+live Akk

Figure S1. Discriminative biomarkers with an LDA score >4.0 in the PICS + live Akk group before (blue) and after (orange) intervention (left); the LefSe cladogram represents the taxa enriched before (blue) and after (orange) intervention (right).

PICS+past. Akk

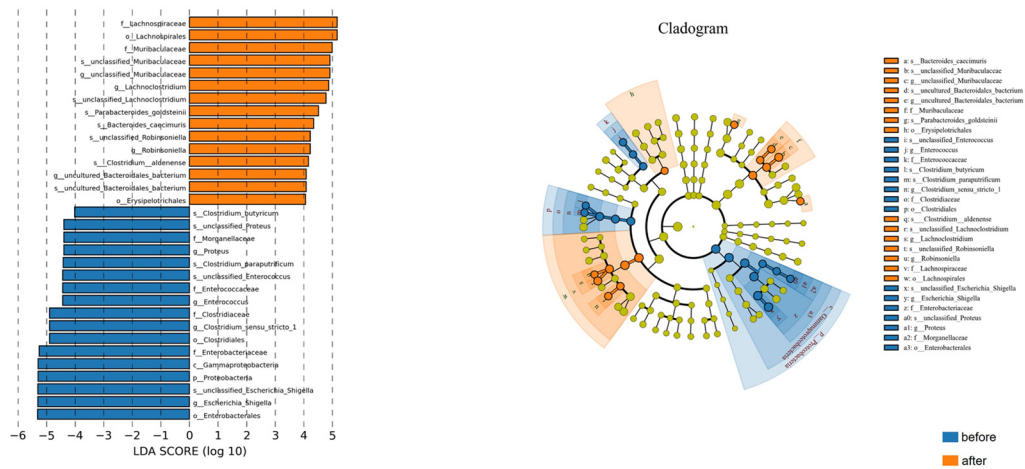

Figure S2. Discriminative biomarkers with an LDA score >4.0 in the PICS + pasteurized Akk group before (blue) and after (orange) intervention (left); the LefSe cladogram represents the taxa enriched before (blue) and after (orange) intervention (right).

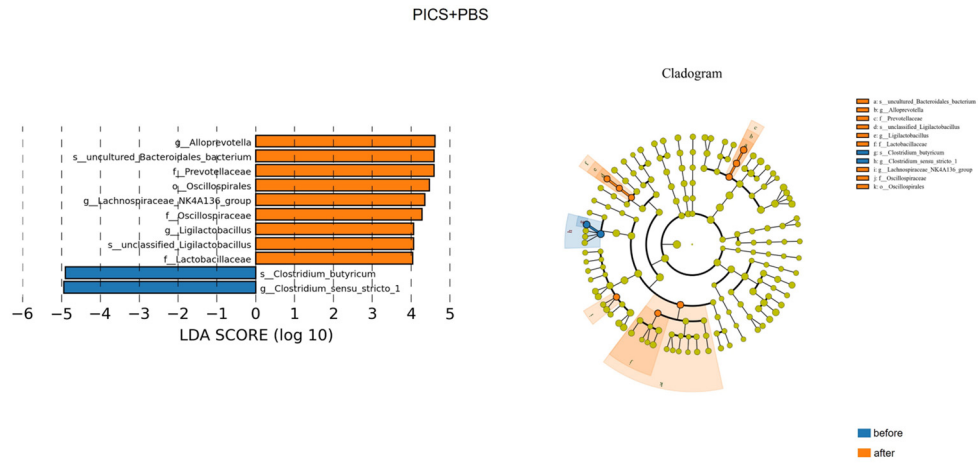

Figure S3. Discriminative biomarkers with an LDA score >4.0 in the PICS + PBS group before (blue) and after (orange) intervention (left); the LefSe cladogram represents the taxa enriched before (blue) and after (orange) intervention (right).
