Results and Discussion

Measurements reported in results and discussion were reproduced on 1.05kΩ and 4.7kΩ resistive load as reported in

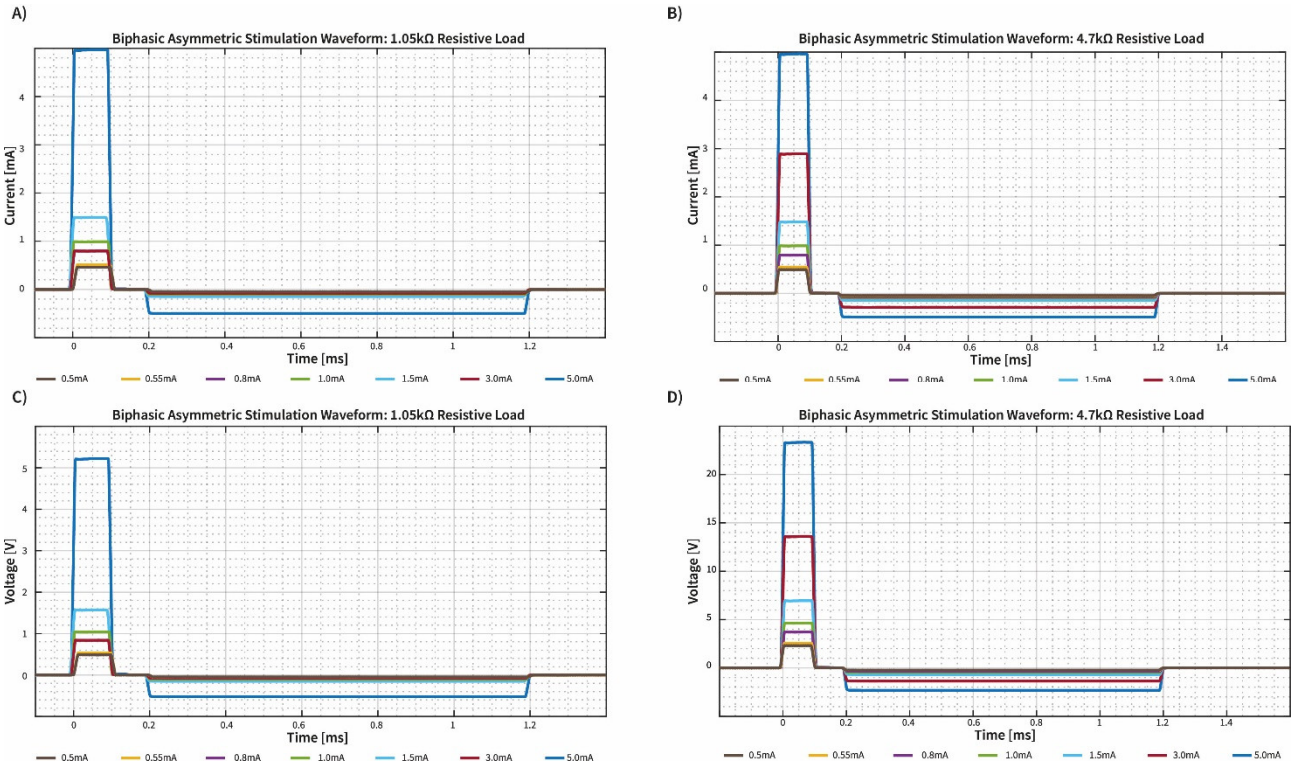

Figure S1 Waveform generation capability using Biphasic asymmetric waveforms with different amplitude and pulse width 100µs were tested on 1.05kΩ resistive load (A-C) and on 4.7kΩ (B-D)

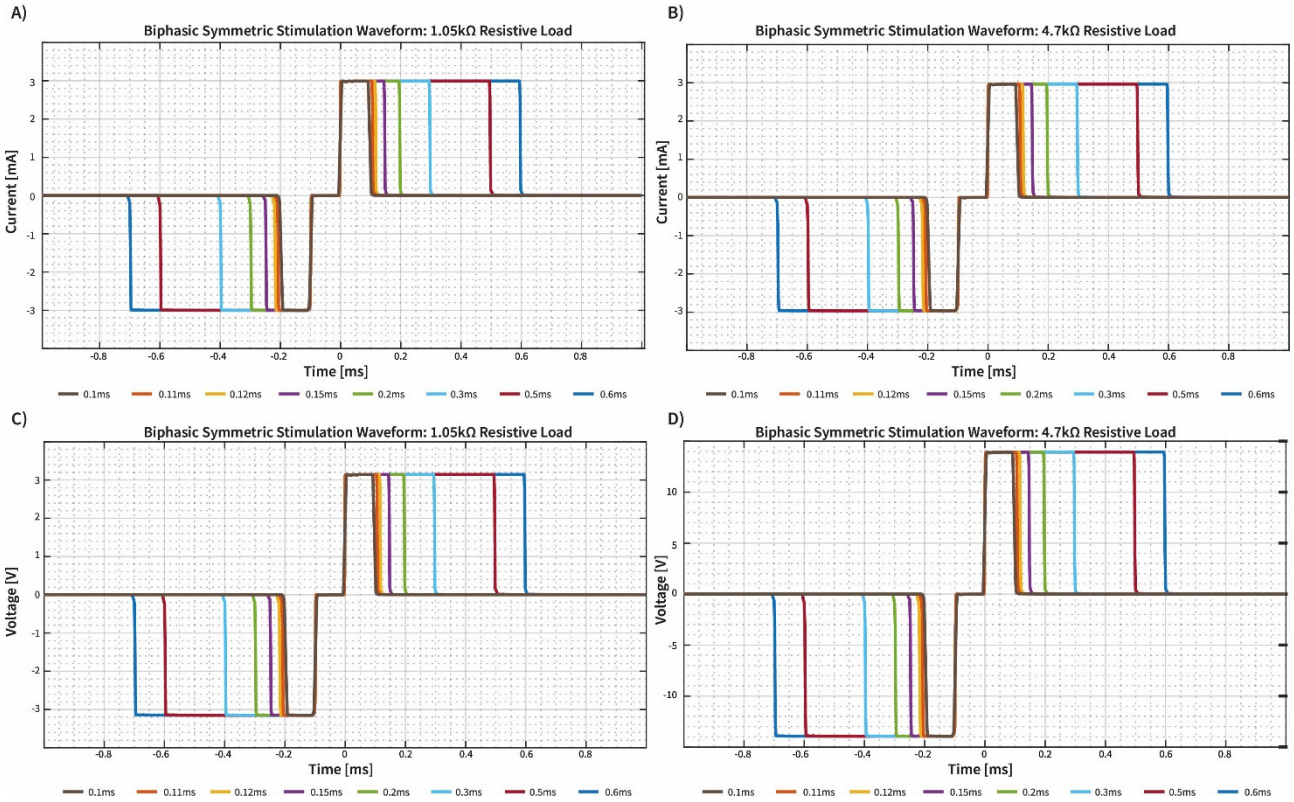

Figure S2 Waveform generation capability using Biphasic symmetric waveforms with different pulse width and amplitude 3mA were tested on 1.05kΩ resistive load (A-C) and on 4.7kΩ (B-D)
