

Figure S4.

Supplementary Figure S4. Bioprotection effect of the six *Trichoderma* isolates against *F. culmorum* infestation on wheat (Khlar variety) in axenic environment, 7 days after seed co-inoculation of fungal protagonists. The white scale bars represent 5 cm. The box on the left is a top view, the right box to the down view.

Untreated seedlings

F. culmorum

T. afroharzianum (Tahz01)

T. afroharzianum (Tahz02)

T. afroharzianum(Tahz03)

T. atrobrunneum (Tatr03)

T. Lentinulae (Tlen01)

T. Lixii (Tlix01)
